Actuarial value funded ratio (actuarial value of assets/AAL)	100.0%
Fair value funded ratio (fair value of assets/AAL)	96.9%

SOUTH DAKOTA RETIREMENT SYSTEM

COMPREHENSIVE ANNUAL FINANCIAL REPORT

A Pension Trust Fund of the State of South Dakota
for the Fiscal Year Ended June 30, 2016

Prepared by the SDRS Finance and Audit Departments

South Dakota Retirement System
222 East Capitol, Suite 8, P.O. Box 1098
Pierre, South Dakota 57501-1098

SDRS MISSION STATEMENT

To plan, implement, manage and efficiently administer financially sustainable retirement

income programs within the fixed resources available.

SDRS CORE VALUES

Provide members and their families the opportunity to achieve financial security at retirement, death or disability by delivering

appropriate and equitable benefits, and promote, encourage and facilitate additional member savings for retirement.

SDRS LONG-TERM INCOME REPLACEMENT GOALS

Provide lifetime income replacement of at least 55 percent of final average compensation for career employees in each membership class.

Promote total lifetime income replacement of at least 85 percent of final average compensation, including income from SDRS, Social Security, and personal retirement savings of at least one time annual compensation at retirement.

South Dakota Retirement System

December 23, 2016

Board of Trustees
South Dakota Retirement System
Pierre, SD 57501

To the Members of the SDRS Board of Trustees:

We are pleased to submit the Comprehensive Annual Financial Report of the South Dakota Retirement System (SDRS) for the fiscal year ended June 30, 2016. Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with SDRS. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of SDRS' operations.

Plan History

SDRS was established July 1, 1974, as a multiple employer public employee retirement system. The plan provides retirement, disability, and survivor benefits to over 84,000 members. The system's benefit provisions have been improved numerous times throughout this period to meet the needs of our members as shown on pages 12-14.

Investments

The SDRS trust fund is managed by the South Dakota Investment Council. The most important overall objective of the Investment Council is to prudently manage the SDRS assets to achieve and exceed the returns that the broad capital markets provide over the long term.

The money-weighted investment return for the SDRS trust fund net of investment expenses was 0.21 percent. The Investment Council's benchmark return was 2.9 percent for the same period. The total time-weighted investment return net of investment expenses for the SDRS trust fund was 0.3 percent for fiscal year (FY) 2016.

Funding and Actuarial Measures

In the 2016 actuarial valuation, three important actuarial measures were calculated to evaluate the actuarial soundness and funding progress of SDRS. They are the funded ratio, the funding period when the unfunded actuarial accrued liability is greater than \$0, and the risk management contribution when the unfunded actuarial accrued liability is equal to \$0.

The actuarial accrued liability (AAL) is the present value of all benefits currently being paid and expected to be paid in the future to all members, less the present value of future normal cost contributions. Each year, an actuarial value funded ratio and a fair value funded ratio are calculated. A ratio in excess of 100 percent indicates that accrued benefits are fully funded.

The funding period measures the length of time the fixed contributions will amortize any unfunded liabilities and meet the on-going benefit costs, interest charges, and expenses of the system. A shorter funding period results in a more favorable actuarial measure.

At June 30, 2016, SDRS has an actuarial value funded ratio of 100.0 percent and a fair value funded ratio of 96.9 percent.

Since its inception, SDRS has been funded by statutorily fixed member and employer contribution rates that historically met the actuarially determined requirements of the system. With no unfunded AAL based on the actuarial value of assets, a portion of contributions can be used to build the cushion to protect the system against future unfavorable experience and enhance the system's sustainability.

The risk management contribution is the amount that statutory contributions exceed the normal cost and amortization payment on the unfunded actuarial accrued liability. When it exists, the risk management contribution will increase the cushion and reserve, thereby better protecting SDRS against future unfavorable experience.

Major Initiatives

SDRS staff continues to focus its efforts on outreach programs to educate members about the important benefit base provided by SDRS, the many challenges retirees face, and ways to extend and enhance financial security throughout retirement. During fiscal year 2016, SDRS retirement planners met with nearly 6,000 members in one-on-one counseling sessions, group events, and requested visits throughout the state.

Communication is also a priority for SDRS. SDRS continues to maintain a Facebook page to engage members through social media. While our newsletter and website continue to be the main sources for the most current SDRS information, these avenues provide additional methods of communication to our membership.

Personal retirement savings is a vital component of each individual's retirement plan. SDRS continues to bring awareness about the importance of personal retirement savings. Building additional resources can help fund retirement goals and provide added financial security during retirement. SDRS members are encouraged to save through the SDRS Supplemental Retirement Plan (SRP) or any choice of other retirement savings programs.

Accounting System and Internal Control

This report has been prepared to conform to the reporting standards of the Governmental Accounting Standards Board and the American Institute of Certified Public Accountants. The accrual basis of accounting is used to record assets, liabilities, revenues, and expenses. Revenues are recognized in the accounting period in which they are earned, without regard to the date of collection, and expenses are recorded when the corresponding liabilities are incurred, regardless of when payment is made. Administrative expenditure authority is granted annually by the South Dakota Legislature.

The system's internal accounting controls, which are reviewed by external auditors on an annual basis, are designed to provide reasonable assurance regarding the safekeeping of assets and the reliability of financial records. The concept of reasonable assurance is based on the assumption that the cost of internal accounting controls should not exceed the benefits expected to be derived from the implementation.

This letter of transmittal is designed to complement the Management's Discussion and Analysis (MD&A) and should be read in conjunction with it. The SDRS MD&A can be found immediately following the Auditor's Opinion.

Professional Services

The Board of Trustees retains independent consultants to perform professional services that are essential to the system's effective and efficient operation. External actuarial services are provided by Buck Consultants. The annual financial audit is conducted by the accounting firm of Eide Bailly with the participation of the South Dakota Department of Legislative Audit. SDRS investments are managed by the South Dakota Investment Council.

Certificate of Achievement/Public Pension Standards Award

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the South Dakota Retirement System for its comprehensive annual financial report for the fiscal year ended June 30, 2015. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. Such financial report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. This is the 21st year that SDRS has received a Certificate of Achievement. We believe our current report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

The Public Pension Coordinating Council awarded the Public Pension Standards Award for Funding and Administration to the South Dakota Retirement System in recognition of meeting the professional standards for plan design and administration. This is the 13th year that SDRS received an award from the Public Pension Coordinating Council.

Acknowledgments and Comments

The preparation of this report reflects the combined efforts of the SDRS staff under the direction of the Board of Trustees. It is intended to provide complete and reliable information to members of SDRS, the Governor, the South Dakota State Legislature, and the citizens of South Dakota.

Respectfully submitted,

Independent Auditor's Report

To the Board of Trustees
South Dakota Retirement System
Pierre, South Dakota

Report on the Financial Statements

We have audited the accompanying financial statements of the South Dakota Retirement System (SDRS), which comprise the statement of fiduciary net position as of June 30, 2016, and the related statement of changes in fiduciary net position, for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

AUDITOR'S OPINION (CONTINUED)

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective statement of the fiduciary net position of the South Dakota Retirement System, as of June 30, 2016, and 2015, and the respective statement of changes in fiduciary net position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Change in Accounting Principle

As discussed in Note 4 to the financial statements, SDRS has adopted the provisions of GASB Statement No. 72, *Fair Valuation Measurement and Application*, which has resulted in additional footnote disclosures. Our opinion is not modified with respect to this matter.

Emphasis of Matter

As described in Note 2 to the financial statements, the financial statements include investments valued at \$2,612,356,121 (24.85% of net position) whose carrying values have been estimated by management in the absence of readily determinable fair values. Management's estimates are based on information provided by the fund managers or the general partners. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the required supplementary information on pages 22-25 and 38-43 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the SDRS's basic financial statements as a whole. The introductory, investment, actuarial, and statistical sections are presented for purposes of additional analysis and are not a required part of the financial statements.

The additional supplementary information accompanying financial information listed as supplemental schedules in the table of contents are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling

such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying financial information listed as supplemental schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory, investment, actuarial, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated October 19, 2016, on our consideration of the SDRS's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SDRS's internal control over financial reporting and compliance.

A handwritten signature in black ink that reads "Erik Sully LLP".

Boise, Idaho
October 19, 2016

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section presents management's discussion and analysis of the South Dakota Retirement System's (SDRS or the System) financial position and performance as of and for the year ended June 30, 2016. This section is intended to supplement the SDRS financial statements and should be read in conjunction with the remainder of the SDRS financial statements.

Financial Highlights

- The fiduciary net position of SDRS decreased by \$263.1 million during fiscal year 2016. This decrease was primarily due to the investment performance of 0.3 percent, which was significantly below the assumed rate of 7.25 percent.
- SDRS paid \$487.1 million to SDRS benefit recipients in fiscal year 2016 compared to \$456.3 million in 2015. SDRS received \$228.5 million in SDRS member and employer contributions in fiscal year 2016 compared to \$219.7 million in 2015.

Overview of the Financial Statements and Accompanying Information

The basic financial statements consist of:

Financial Statements

The System presents the statement of the fiduciary net position as of June 30, 2016, and the statement of changes in fiduciary net position for the year then ended. These statements reflect resources available for the payment of benefits as of the year-end and sources and uses of those funds during the year.

Notes to Financial Statements

The notes to financial statements are an integral part of the financial statements and provide additional detailed information and schedules. Information in the notes provides disclosures concerning SDRS's organization, contributions and reserves, investments, the use of derivatives and securities lending, and other information.

Supplemental Information

In addition to this discussion and analysis, the required supplemental information consists of four schedules of trend data and related notes concerning the funded status of SDRS, changes in net pension asset, investment returns, actuarial assumptions, and employer contributions.

Other supplementary schedules include detailed information on administrative expenses incurred by SDRS and a breakout of investment manager fees.

Financial Analysis

SDRS is a cost-sharing, multiple-employer public employee retirement system. SDRS provides retirement, disability, and survivor benefits for employees of the state of South Dakota and its political subdivisions. The benefits are funded through member and employer contributions and investment income.

SDRS benefits are based on the members' final average compensation, their years of credited service, and a benefit multiplier and are payable for life with a 60 percent survivor benefit.

A summary of the fiduciary net position is shown below:

Assets	2016	2015
Cash and cash equivalents	\$ 6,915,822	\$ 6,807,072
Receivables	56,291,108	28,322,333
Investments, at fair value	10,494,761,258	10,757,834,674
Other assets	1,801,903	1,064,953
Total assets	\$10,559,770,091	\$10,794,029,032
Liabilities		
Accounts payable and accrued expenses	\$ 2,123,716	\$ 2,730,400
Unsettled investment purchases	26,685,838	11,263,148
Due to brokers—futures transactions	17,498,410	3,501,869
Total liabilities	\$ 46,307,964	\$ 17,495,417
Net position restricted for pension benefits	\$10,513,462,127	\$10,776,533,615

**Summary of
Fiduciary Net
Position**
June 30, 2016 and 2015

Additions to the fiduciary net position include member and employer contributions and net investment income. The fixed member and employer contribution rates are established by law. On an annual basis, an independent actuarial valuation of SDRS is made to determine the adequacy of the fixed contribution rates to pay the normal cost of benefits, expenses, and amortize the unfunded actuarial accrued liability. In addition to the fixed contributions, members and employers may make additional contributions to purchase uncredited prior service. These purchase or acquisition payments are also included as contributions. As the SDRS membership ages, the number and amount of purchases have grown.

**Change in
Fiduciary Net
Position**

MANAGEMENT'S DISCUSSION AND ANALYSIS (CONTINUED)

Income from investments is the other primary source of revenue for SDRS. The actuarial assumed investment rate is 7.25 percent at June 30, 2016. The net investment returns were 0.3 percent for 2016 and 4.18 percent for 2015.

Deductions from fiduciary net position are primarily benefit payments. During 2016, SDRS paid \$487.1 million to benefit recipients or 6.7 percent more than 2015. The increase is due to the annual 3.1 percent cost-of-living adjustment and additional annuities. Refunds of accumulated contributions during 2016 decreased 10.5 percent. Administrative costs of SDRS increased 0.9 percent during 2016.

A summary of the changes in fiduciary net position is shown below:

	2016	2015	% Change
Additions:			
Employee contributions	\$ 114,443,295	\$ 110,152,580	3.9%
Employer contributions	114,090,075	109,549,977	4.1
Investment income	<u>22,836,265</u>	<u>435,682,659</u>	<u>(94.8)</u>
Total additions	<u>251,369,635</u>	<u>655,385,216</u>	<u>(61.6)</u>
Deductions:			
Benefits	487,053,001	456,297,424	6.7
Refunds of contributions	23,443,481	26,197,447	(10.5)
Administrative expenses	<u>3,944,641</u>	<u>3,911,222</u>	<u>0.9</u>
Total deductions	<u>514,441,123</u>	<u>486,406,093</u>	<u>5.8</u>
Net change in plan net position	(263,071,488)	168,979,123	(255.7)
Plan net position restricted for pension benefits:			
Beginning of year	<u>10,776,533,615</u>	<u>10,607,554,492</u>	<u>1.6</u>
End of year	<u>\$10,513,462,127</u>	<u>\$10,776,533,615</u>	<u>(2.4)%</u>

Investments

SDRS investment portfolio management is the statutory responsibility of the South Dakota Investment Council. The South Dakota Investment Office is the primary investment manager, but the Investment Council may utilize the services of external money managers.

Net investment performance during 2016 and 2015 was 0.3 percent and 4.18 percent, respectively.

The Investment Council is governed by the prudent-man standard, as defined in South Dakota Codified Law §4-5-27:

§4-5-27. Prudent-man standard required in investments. Any investments under the provisions of §4-5-12 to §4-5-39, inclusive, shall be made with the exercise of that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion, and intelligence exercise in the management of their own affairs, not for speculation but for investment, considering the probable safety of their capital as well as the probable income to be derived.

Though monthly benefit payments exceed monthly contributions, the SDRS is not subject to sudden, substantial, and unexpected withdrawals. As a result, it is not necessary to maintain a high percentage of assets in short-term investments unless that is deemed to be the best investment strategy. This allows the SDRS trust fund to be fully invested in a diversified portfolio of securities.

Investment Summary

While the markets have not always made it possible to achieve the long-term assumptions, the System’s funding remains solid. The reserve for long-term benefit goals has provided a process for both improving benefits and protecting the System in down markets.

Plan Status

Requests for information about SDRS may be directed to the South Dakota Retirement System at P.O. Box 1098, Pierre, SD 57501. You may also contact SDRS online at www.sdrs.sd.gov.

Notes to Financial Statements

1. General Description of the System

The South Dakota Retirement System (SDRS or the System) is a cost-sharing, multiple-employer public employee retirement system (PERS) established to provide retirement benefits for employees of the state of South Dakota (the State) and its political subdivisions. Members of SDRS include full-time employees of public schools, the State, the Board of Regents, city and county governments, and other public entities. Public schools, cities, and counties may choose not to include certain full-time employees in the System.

SDRS is considered a part of the State financial reporting entity and is included in the State’s financial report as a pension trust fund. Authority for establishing, administering, and amending plan provisions is found in South Dakota Codified Law (SDCL) 3-12.

The South Dakota Retirement System Board of Trustees (the Board) is the governing authority of SDRS. The Board consists of 14 elected representatives from participating groups, two appointees of the governor, and an ex-officio nonvoting representative of the South Dakota Investment Council. The elected representatives of the Board are two teacher members; two State employee members; a participating municipality member; a participating county member; a participating classified employee member; a current contributing Class B member other than a justice, judge, or magistrate judge; a county commissioner of a participating county; a school district board member; a justice, judge, or magistrate judge; an elected municipal official of a participating municipality; a retiree; and a faculty or administrative member employed by the Board of Regents. The two Governor’s appointees consist of one head of a principal department established pursuant to SDCL 1-32-2, or one head of a bureau under the office of executive management and one individual from the private or public sector.

SDRS is a hybrid defined benefit plan designed with several defined contribution plan type provisions. The system includes three classes of members: Class A general members, Class B public safety and judicial members, and Class C Cement Plant Retirement Fund members. Members and their employers make matching contributions, which are defined in State statute. SDRS may expend up to 3 percent of the annual contributions for administrative expenses subject to approval by the executive and legislative branches of the State.

SDRS provides retirement, disability, and survivor benefits. The right to receive retirement benefits vests after three years of contributory service. Class A members and Class B judicial members who retire after age 65 with three years of service are entitled to an unreduced annual retirement benefit. An unreduced annual retirement benefit is also available after age 55 for Class A members where the sum of age and credited service is equal to or greater than 85 or after age 55 for Class B judicial members where the sum of age and credited service is equal to or greater than 80. Class B public safety members can retire with an unreduced annual retirement benefit after age

55 with three years of contributory service. An unreduced annual retirement benefit is also available after age 45 for Class B public safety members where the sum of age and credited service is equal to or greater than 75. All retirement benefits that do not meet the above criteria may be payable at a reduced level. Class C Cement Plant Retirement Fund members have a normal retirement age of 65 and early retirement is age 55 with the required credited service. Class C provides for disability payments for those disabled on or before March 16, 2001. All participants of the Plan on March 15, 2001, were 100 percent vested.

The annual increase in the amount of the SDRS benefits payable on each July 1st is indexed to consumer price index (CPI) and based on the SDRS funded status:

- If the SDRS fair value funded ratio is 100 percent or more—3.1 percent COLA
- If the SDRS fair value funded ratio is 80.0 percent to 99.9 percent, index with the CPI
 - * 90.0 to 99.9 percent funded—2.1 percent minimum and 2.8 percent maximum COLA
 - * 80.0 to 90.0 percent funded—2.1 percent minimum and 2.4 percent maximum COLA
- If the SDRS fair value funded ratio is less than 80 percent—2.1 percent COLA

All benefits except those depending on the Member’s Accumulated Contributions are annually increased by the Cost-of-Living Adjustment.

SDRS is a qualified defined benefit retirement plan under Section 401(a) of the Internal Revenue Code and is exempt from federal income taxes. SDRS last received a favorable determination letter dated October 3, 2016, in which the Internal Revenue Service stated that the System, as then designated, was in compliance with the applicable requirements of the Internal Revenue Code. SDRS believes that the system currently is designed and being operated in compliance with the applicable requirements of the Internal Revenue Code, and therefore, SDRS continues to be tax-exempt. Therefore, no provision for income taxes has been included in SDRS’s financial statements.

SDRS is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. SDRS participates in the various programs administered by the State. These risk management programs are funded through assessments charged to participating entities. The risk management programs include (1) coverage for risks associated with automobile liability and general tort liability (including public officials’ errors and omissions liability, medical malpractice liability, law enforcement liability, and products liability) through the State’s Public Entity Pool for Liability Fund, (2) coverage of employee medical claims through the State’s health insurance program, (3) coverage for unemployment benefits through the State’s Unemployment Insurance Fund, and, (4) coverage for workers’ compensation benefits through the State’s Workers’

Compensation Fund. Financial information relative to the self-insurance funds administered by the State is presented in the State of South Dakota Comprehensive Annual Financial Report.

As of June 30, 2016, the number of participating governmental employers is as follows:

School districts	165
State of South Dakota	1
Board of Regents	1
Municipalities	158
Counties	64
Boards and commissions	96
Total employers	485

At June 30, 2016, SDRS membership consists of the following:

Retirees and beneficiaries currently receiving benefits:	
Class A (general employees)	24,722
Class B (public safety and judicial employees)	1,590
Class C (cement plant employees)	242
Total retirees and beneficiaries	26,554

Terminated members entitled to benefits but not yet receiving them:	
Class A (general employees)	16,663
Class B (public safety and judicial employees)	847
Class C (cement plant employees)	44
Total terminated members	17,554

Current active members:	
Vested:	
Class A (general employees)	28,461
Class B (public safety and judicial employees)	2,187
Class C (cement plant employees)	17
Non-vested:	
Class A (general employees)	8,523
Class B (public safety and judicial employees)	752
Total current active members	39,940
Grand total	84,048

* There are 123 Class A and 11 Class B public safety and judicial members or beneficiaries whose benefits are currently suspended but are entitled to future benefits. These members or beneficiaries are included as retirees and beneficiaries in their respective classes as listed.

2. Summary of Significant Accounting Policies

(a) Basis of Accounting and Presentation

The accompanying financial statements are prepared using the accrual basis of accounting in accordance with U.S. generally accepted accounting principles applicable to governmental accounting for a pension trust fund. Employee and employer contributions are recognized when due pursuant to formal commitment, as well as statutory requirements. Pension benefit payments are due the first day of the month following the retirement of a member, and the first of each month thereafter. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

(b) Method Used to Value Investments

Investments are reported at fair value, in accordance with GASB Statement No. 72. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. GASB 72 sets forth the framework for measuring value. The framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels. The three levels of the fair value hierarchy under GASB 72 are described as follows:

Level 1—Valuation inputs are quoted prices in active markets for identical asset or liability as of the measurement date.

Level 2—Valuation inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly or indirectly.

Level 3—Valuation inputs are based on significant unobservable inputs for an asset or liability.

As a practical expedient, GASB 72 allows the net asset value (NAV) or its equivalent to be used when a readily determinable fair value is not available. The NAV valuations are based on valuations of the underlying companies as determined and reported by the fund manager or general partner and are excluded from the fair value hierarchy.

Additional required disclosures can be found in Note 5: Cash and Investments.

Investments denominated in foreign currencies are translated into USD using the year-end spot foreign currency exchange rates. Foreign exchange rate gains and losses are included with the net appreciation in fair value of investments.

Alternative investments consist of investments in a variety of markets and industries through partnerships, corporate entities, co-investments, and other investment vehicles. For alternative investments where no readily ascertainable market value exists, management, in consultation with their investment advisors, values these investments in good faith based upon the investment's current financial statements or other information provided by the underlying investment advisor. For all of these alternative investments, SDRS has determined that net asset value reported by the underlying fund approximates the fair value of the investment. These fair value estimates are, by their nature, subjective and based on judgment. These alternative investments were valued at \$2,612,356,121 (24.85 percent of net position) at June 30, 2016. The estimated fair value of these investments may differ significantly from values that would have been used had a ready market existed.

Foreign exchange rate gains and losses are included with the

BASIC FINANCIAL STATEMENTS (CONTINUED)

net appreciation in fair value in investments. Futures contracts are marked to market based on quoted futures prices with changes in fair value reflected in the current period.

Interest is accrued in the period in which it is earned and dividend income is recorded on the ex-dividend date.

(c) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(d) New GASB Implementation

In fiscal year 2016, SDRS implemented Government Accounting Standards Board Statement No. 72, *Fair Value Measurement and Application*. GASB 72 addresses accounting and financial reporting issues related to fair value measurements and guidance for financial reporting purposes. There was no material impact on valuation inputs used to measure fair value as a result of the implementation of GASB 72.

3. Contributions and Reserves

(a) Contributions

Covered employees are required by statute to contribute a percentage of their salary to SDRS as follows:

Class A members	6 percent of salary
Class B public safety members	8 percent of salary
Class B judicial members	9 percent of salary

All participating employers are required to contribute an amount equal to the members' contributions. Members may make an additional contribution of 1.5 percent of compensation for optional spouse coverage (closed to new enrollees after July 1, 2010).

SDRS is funded by fixed member and employer contributions at a rate established by South Dakota law. On an annual basis, an actuarial valuation of SDRS is performed to determine the adequacy of the fixed contributions to pay the normal costs and expenses if the System is fully funded or pay the normal costs, expenses, and amortize the frozen unfunded actuarial accrued liability (UAAL) if the System is not fully funded. The June 30, 2016, actuarial valuation of the plan determined that the System is fully funded based on the actuarial value of assets and that the statutorily required employer contributions meet the requirements for the annual required contributions of the employers under Governmental Accounting Standards Board (GASB) Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans* along with amendments included in Statement No. 67, *Financial Reporting for Pension Plans*; and

the statutorily required employer contributions are sufficient to pay the employer normal cost and expenses. Annual required contributions of the employers equal to the statutorily required contributions have been listed below pursuant to GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, with revisions in Statement No. 68, *Accounting and Financial Reporting for Pensions*.

Contributions during fiscal year 2016 totaling \$228,533,370 (\$114,443,295 employee, \$114,090,075 employer) were made in accordance with statutory rates. The employee contributions exceed the employer contributions because of optional spouse coverage contributions and employee service purchase payments. Contributions for the last 5 fiscal years are as follows:

<u>Year ending June 30</u>	<u>Employer</u>	<u>% Contributed</u>
2016	\$114,090,075	100%
2015	109,549,977	100
2014	104,952,985	100
2013	100,376,481	100
2012	98,866,649	100

SDRS allows participating entities to pay their deferred contributions for funding of accrued benefits over periods of up to 20 years and members to pay for the purchase of certain prior service over periods of up to 10 years. Interest is charged at rates of 5 percent to 8 percent.

Future payments will be received as follows:

<u>Year ending June 30</u>	<u>Employees</u>
2017	\$53,773
2018	32,254
2019	24,389
2020	25,180
2021	22,067
Later	<u>35,756</u>
Deferred contributions receivable at June 30, 2016	<u>\$193,419</u>

(b) Reserves

The reserve for funding of long-term benefit goals is designed to fund benefit improvements and provide the plan with protection against adverse experience. The reserve for funding of long-term benefit goals is equal to the cumulative amounts credited or debited annually based on the immediate recognition of actuarial investment losses, the five-year recognition of actuarial investment gains, and the five-year recognition of SDRS liability gains or losses, less reductions described below. If benefit improvements are enacted into law and funded from the reserve for funding of long-term benefit goals, the reserve for funding of long-term benefit goals is reduced by the present value of all benefits for those improvements. The reserve for funding of long-term benefit goals may also be reduced to offset unfavorable experience or to meet the funding objectives of SDRS as established by the

Board of Trustees. As of June 30, 2016, the balance in the reserve for funding of long-term benefit goals is (\$908,851,561). The reserve will increase by net gains of \$486 million that will be recognized in the reserve for funding of long-term benefit goals over the next four years. The current negative balance in the reserve does not indicate any additional funding requirements.

4. Net Pension Liability of the System

The components of the net pension liability of the System at June 30, 2016, was as follows:

Total pension liability	\$ 10,851,252,302
Plan fiduciary net position	<u>(10,513,462,127)</u>
Net pension liability	<u>\$ 337,790,175</u>

Fiduciary net position as a percentage of net pension liability 96.9%

Actuarial Assumptions—The total pension liability was determined by an actuarial valuation as of June 30, 2016, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.25%
Salary increases	5.83% at entry to 3.75% after 30 years of service
Discount rate	7.25% through 2017 and 7.50% thereafter, net of pension plan investment expense

Mortality rates were based on the RP-2000 Mortality Table, projected generationally with Scale BB and adjusted for males and females, as appropriate.

The actuarial assumptions used in the June 30, 2016, valuation were based on the results of an actuarial experience study for the period of July 1, 2005, to June 30, 2011. The mortality assumptions were revised based on an extension of the experience study including mortality experience through June 30, 2013.

Discount Rate—The discount rate used to measure the total pension liability was 7.25 percent through 2017 and 7.50 percent thereafter. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that matching employer contributions will be made at rates equal to the member rate. Based on those assumptions, the pension plan’s fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of (asset)/liability to changes in the discount rate—The following presents the net pension (asset)/liability of the System, calculated using the discount rate of 7.25 percent

through 2017 and 7.50 percent thereafter, as well as what the System’s net pension asset would be if it were calculated using a discount rate that is 1 percent point lower (6.25/6.50 percent) or 1 percent point higher (8.25/8.50 percent) than the current rate:

	<u>1% Decrease</u>	<u>Current Discount Rate</u>	<u>1% Increase</u>
System’s net pension (asset)/liability	\$1,890,269,326	\$337,790,175	\$(928,423,300)

5. Cash and Investments

Cash and Deposits

Cash and cash equivalents are held by the State Treasurer and were invested in the State’s pooled investment fund. Investments in the State’s pooled investment fund consist primarily of short-term U.S. Treasury and Agency obligations, short-term US Corporate securities, bank certificates of deposit, and money market funds.

The custodial credit risk for deposits is the risk that, in the event of the failure of a depository institution, a government will not be able to recover deposits or will not be able to recover collateral securities that are held in the possession of an outside party. SDRS has a formal deposit policy specific to custodial credit risk and foreign currencies. Policy states that the USD equivalent of any non-USD currency cannot exceed 2.0 percent of any portfolio on a trade date +7 days basis. All portfolios as of June 30, 2016, meet policy guidelines. These deposits are not collateralized or covered by depository insurance. As a result, \$3,173,427 was exposed to custodial credit risk, which are recorded in investments in the statement of fiduciary net position.

Investments

Investment portfolio management is the statutory responsibility of the South Dakota Investment Council (SDIC), which may utilize the services of external money managers for management of a portion of the portfolio. SDIC is governed by the Prudent Man Rule (i.e., the council should use the same degree of care as a prudent man). Current SDIC investment policies dictate limits on the percentage of assets invested in various types of vehicles (equities, fixed income securities, real estate, cash, private equity, etc.). The long-term expected rate of return on pension plan investments was determined using a method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined by geometric means to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of real rates of return for each major asset class included in the pension plan’s target asset allocation as of June 30, 2016 (see the discussion of the pension plan’s

BASIC FINANCIAL STATEMENTS (CONTINUED)

investment policy) are summarized in the following table:

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Global equity	58%	4.8%
Fixed income	30%	1.8%
Real estate	10%	4.6%
Cash	<u>2%</u>	<u>0.7%</u>
	100%	

Below is a detail of the investment balances and amounts managed by the respective fund managers:

	<u>Cost</u>	<u>Fair Value</u>
State of South Dakota Investment Council	\$6,787,130,150	\$7,611,316,131
Apollo	8,767,102	5,595,961

(a) Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The investment grade fixed income portfolios of SDRS are benchmarked to the duration of the Citigroup Broad Investment Grade (BIG) Index and must fall between 70 percent and 130 percent of the BIGs duration.

The durations of the various investment types are listed in the following table:

<u>Investment type</u>	<u>Fair value</u>	<u>Duration (in years)</u>
U.S. Treasuries	\$77,937,480	5.80
U.S. Treasury Bills	88,393,401	0.21
U.S. Treasury strips	152,998,425	8.76
U.S. agencies	54,032,141	3.80
U.S. agencies discount notes	31,151,461	0.08
Investment grade corporates	388,068,688	4.78
High-yield corporates	758,588,244	3.83
Agency mortgage-backed securities	353,424,782	3.75
Non-agency mortgage-backed securities	<u>610,162,086</u>	<u>0.54</u>
Total	<u>\$2,514,756,708</u>	<u>3.36</u>

The SDRS fixed income portfolios invest in mortgage-backed securities. These securities are sensitive to prepayments by mortgagees, which is likely in declining interest rate environments, thereby reducing the value of these securities.

(b) Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to SDRS. SDIC sets the investment policy annually for the SDRS. This policy establishes the average percentage invested in each asset category and the fund allocation range that each asset category can vary during the fiscal year. As of June 30, 2016, the portfolios held the following investments, excluding those issued by or explicitly guaranteed by the U. S. government, which are not considered to have credit risk. The investments are grouped as rated by Moody's Investors Service.

<u>Moody's rating</u>	<u>Fair value</u>
Aaa	\$981,564,975
Aa	91,160,699
A	145,800,096
Baa	215,772,906
Ba	224,724,831
B	251,404,755
Caa	471,210,615
Ca	175,793,150
P-1	31,151,462
Unrated	164,220,031
Total	<u>\$2,752,803,520</u>

(c) Concentration of Credit Risk

Concentration of credit risk is the risk of loss that may be attributed to the magnitude of SDRS's investment in a single issuer. SDRS does not have guidelines to limit its investments in any particular investment. SDRS does not have investments in any one issuer that represent 5 percent or more of the total fair value of investments as of June 30, 2016 (excluding those issued by or explicitly guaranteed by the U.S. government).

(d) Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. SDRS's exposure to foreign currency risk derives from its positions in foreign currency and foreign-currency-denominated equity and fixed income investments. SDRS does not hedge foreign currency back to U.S. dollars (to match the unhedged benchmark), but does allow hedging under certain circumstances, when deemed appropriate. The portfolio's exposure to foreign currency risk at June 30, 2016, is as follows (in U.S. dollar fair value):

Currency	Equities	Fixed income	Cash	Total
Australian Dollar	\$ 7,176,790	—	\$ 42,353	\$ 7,219,143
Brazilian Real	2,525,783	—	53,246	2,579,029
British Pound	251,113,815	—	1,527,492	252,641,307
Canadian Dollar	83,589,193	—	211,590	83,800,783
Danish Krone	3,145,592	—	44,618	3,190,210
Euro	234,706,732	—	356,210	235,062,942
Hong Kong Dollar	4,362,427	—	27,170	4,389,597
Hungarian Forint	569,869	—	19,166	589,035
Japanese Yen	110,498,801	—	888,641	111,387,442
Korean Won	56,284,913	—	2,936	56,287,849
Norwegian Krone	600,195	—	—	600,195
Singapore Dollar	391,420	—	—	391,420
Swedish Krona	1,132,909	—	—	1,132,909
Swiss Franc	217,355,158	—	4	217,355,162
Thai Baht	920,319	—	—	920,319
Total fair value	\$974,373,916	—	\$3,173,426	\$977,547,342

Investments with limited partnerships and certain global equity investments with external managers, which are not included in the table above, may expose SDRS's portfolio to additional foreign currency risk. The total fair value of investments in real estate and private equity limited partnerships as of June 30, 2016, was \$1,935,227,210. The total fair value of global equity and high-yield fixed income investments managed by external managers was \$146,689,934 and \$33,801,273, respectively.

(e) Return on Investments

During fiscal year 2016, SDRS's investments (including investments bought and sold, as well as held during the year) depreciated in value by \$209,983,510.

The calculation of realized gains and losses is independent of a calculation of the net change in the fair value of investments. Realized gains and losses on investments that had been held in more than one fiscal year and sold in the current year were included as a change in the fair value of investments reported in the prior years and current year.

Change in Fair Value of Investments

Appreciation (Depreciation) in fair value of investments:	
Equities	\$ (545,219,691)
Fixed income	39,076,076
Real estate	(86,793,174)
Private equity	(106,178,621)
Change in accrued income	8,235,164
Total decrease in fair value	(690,880,246)
Realized gain (loss) on investments:	
Equities	260,800,394
Fixed income	65,731,698
Real estate	78,263,535
Private equity	124,615,366
Total net realized gains	529,410,993
Futures—change in unrealized gain (loss)	(20,110,920)
Futures—realized gain (loss)	(28,403,337)
Net loss on futures	(48,514,257)
Net appreciation in investments	\$ (209,983,510)

(f) Securities Lending

State statutes and the SDRS policies permit the use of investments for securities lending transactions. These

transactions involve the lending of corporate debt, foreign equity securities, and domestic equity securities to broker-dealers for collateral in the form of securities, with the simultaneous agreement to return the collateral for the same securities in the future. The SDRS's securities custodian is an agent in lending securities and shall accept only U.S. government securities or its agencies as collateral for any loan or loaned securities. The collateral required must equal 102 percent of fair value plus accrued interest for corporate debt securities, 102 percent of fair value for U.S. equity securities, and 105 percent of fair value for foreign securities except in the case of loans of foreign securities, which are denominated and payable in U.S. dollars, in which event the collateral required is 102 percent of fair value. The earnings generated from the collateral investments result in the gross earnings from lending activities, which is then split on a percentage basis with the lending agent.

The fair value of securities on loan as of June 30, 2016, was \$175,272,679 and the collateral held on the same date was \$179,413,589. The SDRS has no credit risk exposure to borrowers because the amounts the SDRS owes the borrowers exceed the amounts the borrowers owe the SDRS. The contract with the lending agent requires the agent to indemnify the SDRS if the borrowers fail to return the loaned securities and the collateral is inadequate to replace the securities lent.

All securities loans can be terminated on demand by either the SDRS or the borrower. The SDRS does not have the ability to pledge or sell collateral securities unless the borrower defaults; therefore, no asset and corresponding liability for the collateral value of securities received has been established on the statement of fiduciary net position. Regarding restrictions on loans, the securities lending agreement does limit the total value of securities that can be out on loan on any given day.

(g) Custodial Credit Risk

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, a government will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. SDRS securities lending policies are detailed in the preceding Securities Lending section. As of June 30, 2016, the SDRS does not have custodial credit risk with regard to the security lending collateral.

BASIC FINANCIAL STATEMENTS (CONTINUED)

(h) Fair Value Measurements and Applications

The following table shows the fair value in accordance with the GASB hierarchy:

	<u>06/30/16</u>	<u>Fair Value Measurements Using</u>		
		<u>Quoted Prices in Active Markets for Identical Assets Level 1</u>	<u>Significant Other Observable Inputs Level 2</u>	<u>Significant Unobservable Inputs Level 3</u>

Equity securities classified in Level 1 of the fair value hierarchy are valued using quoted prices in active markets for identical securities as of the measurement date as issued by pricing vendors. The security classified in Level 2 of the fair value hierarchy is valued using a quoted price for an identical security in an inactive market.

Fixed income securities classified in Level 2 of the fair value hierarchy are valued using observable inputs other than quoted prices for identical securities. The prices are determined by the use of matrix pricing techniques maintained by the various pricing vendors for these securities. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

Real estate funds classified in Level 3 of the fair value hierarchy are real estate alternative investments that invest primarily in overseas commercial real estate. These are investments which quoted prices are not readily available and are valued at estimated values as determined by the General Partner (GP). Investments are valued by the GP using one or more valuation methodologies with reference to the International Private Equity and Venture Capital Valuation Guidelines. The estimated fair values are subjective and based on judgment.

The Other Fund classified in Level 3 of the fair value hierarchy is valued at zero. It is an investment in an alternative investment fund that invested in distressed and

defaulted debt securities and equities of financially troubled companies. All positions in the fund have been liquidated and only cash remains. The fund holds contingent liabilities that offset cash. Due to the highly questionable outcome of the contingent liabilities it has been determined that a value of zero best reflects the fair value considering the information available as of June 30, 2016.

SDRS holds shares or interest in investments where the fair value of the investments are measured on a recurring basis using net asset value per share (or its equivalent) of the investment as a practical expedient. The NAV valuations are based on valuations of the underlying companies as determined and reported by the fund manager or general partner.

Derivative instruments classified in Level 1 of the fair value hierarchy represents the pending variance margin on futures contracts which is calculated using quoted prices in active markets for identical securities. Derivative instruments classified in Level 2 of the fair values hierarchy are valued using observable inputs other than quoted prices for identical securities. The foreign currency forward contract valuations are determined by interpolating FX rates for various settlement dates as of June 30, 2016.

The valuation method for investments measured at the net asset value (NAV) per share (or its equivalent) is presented in the following table:

Investments Measured at the NAV

	Fair Value	Unfunded Commitments	Redemption Frequency (if currently eligible)	Redemption Notice Period
Short-Term Investment Funds (a)	\$ 659,552,084		Daily	0 days
Emerging Markets Small Cap Equity Mutual Funds (b)	49,312,252		Daily	1 day
Multi Strategy Hedge Funds (c)	97,377,683		Monthly	5-30 days
Alternative investments				
Real Estate Funds (d)	1,220,558,755	\$667,369,243		
Private Equity Funds (e)	709,610,272	575,174,180		
Other Funds (f)	33,801,273			
Total alternative investments	1,963,970,301			
Investments measured at the net asset value (NAV)				
Real Estate Funds (Level 3)	\$ 5,058,183	\$ 13,193,411		

(a) Short-Term Investment Funds. This type includes investments in four open-end mutual funds that invest exclusively or primarily in high-quality, short-term securities that are issued or guaranteed by the U.S. government or by U.S. government agencies and instrumentalities. The fair values of the investments in this type have been determined using the NAV per share of the investments.

(b) Emerging Markets Small Cap Equity Mutual Funds. This type includes one investment in an open-end mutual fund that emphasizes broad diversification and consistent exposure to emerging market small company stocks. The fair value of the investment in this type has been determined using the NAV per share of the investment.

(c) Multi-Strategy Hedge Funds. This type includes two investments in funds that may invest in a wide range of asset classes in order to meet fund objectives. The fair values of the investments in this type have been determined using the NAV per share of the investments.

(d) Real Estate Funds. This type includes 23 real estate funds that invest primarily in commercial real estate. The fair values of the investments in this type have been determined using the NAV per share (or its equivalent) of the portfolio's ownership interest in partners' capital. These investments can never be redeemed from the funds. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the underlying assets of the funds will be liquidated over the next 20 years. Because it is not probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share (or its equivalent) of the portfolio's ownership interest in partners' capital.

(e) Private Equity Funds. This type includes 37 private equity funds that invest primarily in leveraged buyouts. The fair values of the investments in this type have been determined using the NAV per share (or its equivalent) of the portfolio's ownership interest in partners' capital. These investments can never be redeemed from the funds. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the underlying assets of the funds will be liquidated over the next 20 years. Because it is not probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share (or its equivalent) of the portfolio's ownership interest in partners' capital.

(f) Other Funds. This type includes two other alternative investments that invest primarily in the broad range of debt, debt-related, and/or real estate-related investments. The fair value of the investment has been determined using the NAV per share (or its equivalent) of the portfolio's ownership interest in partners' capital. This investment can never be redeemed from the funds. Distributions from the fund will be received as the underlying investments of the funds are liquidated. It is expected that the underlying assets of the fund will be liquidated over the next 5 years. Because it is not probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share (or its equivalent) of the portfolio's ownership interest in partners' capital.

6. Derivatives

Derivatives are generally defined as contracts whose values depend on, or derive from, the value of an underlying asset, reference rate, or index. SDRS is exposed to various derivative products through the investment management of the SDIC and its external managers. All of the SDRS's derivatives are classified as investment derivatives.

Futures Contracts

A futures contract is a contract to buy or sell units of an index or financial instrument at a specified future date at a price agreed upon when the contract is originated. The SDIC purchases and sells futures contracts as a means of adjusting the SDRS portfolio mix at a lower transaction cost than the transactions, which would otherwise occur in the underlying portfolios. During fiscal year ended June 30, 2016, S&P 500 futures and 10-year U.S. Treasury note futures were utilized. Upon entering into such a contract, the SDRS pledges to the broker cash or U.S. government securities equal to the minimum initial margin requirement of the futures exchange. Additionally, SDRS receives or pays a daily variation margin, which is an amount of cash equal to the daily fluctuation in value of the contract. The pending variation margin at June 30, 2016, of (\$17,498,410) is presented in the statement of fiduciary net position as "Due to broker—futures transactions." The change in fair value of the futures contracts is presented in the statement of changes in fiduciary net position as "Net depreciation in fair value of investments." The net change in fair value from futures contracts for fiscal year ended June 30, 2016, was (\$48,514,258).

Futures contract positions at June 30, 2016, were as follows:

Description	Expiration Date	Open position	Number of contracts	Notional contract size	Fair value
U.S. Treasury note	Sept 2016	Long	2,335	100,000 par value 6%, 10-year U.S. Treasury note	\$310,518,527
S&P 500 Index	Sept 2016	Short	14,800		\$(1,546,748,000)

Foreign Currency Forward Contracts

The SDIC enters into foreign exchange forward contracts for SDRS to manage foreign currency exposure, as permitted by portfolio policies. The fair values of the contracts are presented

BASIC FINANCIAL STATEMENTS (CONTINUED)

in the statement of fiduciary net position as Investments, at fair value—Equities. The change in fair value of the forward contracts is presented in the statement of changes in fiduciary net position as “Net appreciation in fair value of investments.” The net change in fair value from foreign currency forward contracts for fiscal year ended June 30, 2015, was \$5,219,791. At June 30, 2015, the foreign currency forward contracts outstanding were as follows:

<u>Description</u>	<u>Notional amount</u>	<u>Currency</u>	<u>Maturity date</u>	<u>Fair value (US dollars)</u>
Forward sale	(20,770,519)	CHF	08/10/2016	\$ 211,770
Forward sale	(158,375,000)	CNY	11/03/2016	110,191
Forward purchase	158,375,000	CNY	11/30/2016	(933,016)

(a) Credit Risk

SDRS is exposed to credit risk on derivative instruments that are in asset positions. The SDIC attempts to minimize credit risk by entering into derivatives contracts with major financial institutions. At June 30, 2016, the net fair value of foreign currency forward contracts was \$211,770. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform as contracted. The credit ratings of the counterparties are as follows:

<u>Moody’s credit rating</u>	<u>Number of counterparties</u>	<u>Fair value</u>
A1	1	\$211,770

(b) Foreign Currency Risk

SDRS is exposed to foreign currency risk on its foreign currency forward contracts because they are denominated in foreign currencies. The net fair value of the foreign currency forward contracts in U.S. dollars is \$(611,056).

7. Compensated Absences

Annual leave is earned by all SDRS employees. Upon termination, SDRS employees are eligible to receive compensation for their accrued annual leave balances. At June 30, 2016, a liability existed for accumulated annual leave calculated at the employees’ June 30, 2016, pay rate in the amount of \$153,003. Employees who have been continuously employed by SDRS and the State for at least seven years prior to the date of their retirement, voluntary resignation, or death will receive payment for one-fourth of their accumulated sick leave balance with such payment not to exceed the sum of 12 weeks of the employee’s annual compensation. For employees who have not been employed for seven continuous years, an accrued liability is calculated assuming the likelihood that they will meet the seven-year threshold in the future. At June 30, 2016, a liability existed for accumulated and accrued sick leave, calculated at the employees’ June 30, 2016, pay rate in the amount of \$169,282.

	<u>2016</u>	<u>2015</u>	<u>% change</u>
Total compensated absences	\$322,285	\$298,291	8.04%

The total leave liability for the current year is on the statement of fiduciary net position available for benefits in accounts payable and accrued expenses.

8. Operating Leases

The SDRS has entered into an agreement to lease office space effective September 2012 and has a term of ten years. A schedule of minimum office rental payments as of June 30, 2016, is as follows for the fiscal year ending June 30:

2017	\$ 104,471
2018	104,471
2019	104,471
2020	104,471
2021	104,471
Thereafter	<u>208,942</u>
Total remaining minimum payments	<u>\$ 626,826</u>

Lease expense for the year ending June 30, 2016, was \$104,471.

9. Supplemental Retirement Plan

SDRS offers a deferred compensation plan known as the Supplemental Retirement Plan (SRP), created in accordance with Internal Revenue Code Section 457. SRP is available to all public employees and permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseen emergency.

All amounts of compensation deferred under the SRP, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are at all times held in trust for the exclusive benefit of the participants until made available to a participant or the participant’s beneficiary.

Of the \$288,381,719 net position restricted for plan benefits at June 30, 2016, \$174,975,562 was held in trust for employees of the State, while the remaining \$113,406,157 represents the assets held in trust for employees of other jurisdictions. In order to avoid duplication in reporting, the SDRS total of \$1,681,629 is included in the State total and the State’s comprehensive annual financial report for the year ended June 30, 2016.

10. Special Pay Plan

The Special Pay Plan (SPP) was established in July 2004 as a qualified plan pursuant to Internal Revenue Code Section 401(a) under the administrative responsibility of the SDRS Board of Trustees. South Dakota state government and the South Dakota Board of Regents are participating units and every state political subdivision may become a participating unit in the plan. The SPP mandates that qualifying employees (over age 55 and \$600 or more in special pay) of participating units defer 100 percent of their special lump-sum termination pay to the plan. The participating unit transfers the deferred pay to the fund. This deferred pay is available to a participant immediately after termination, upon later retirement, or to beneficiaries or an estate upon the participant’s death.

Of the \$46,602,150 net position restricted for plan benefits at June 30, 2016, \$26,011,589 was held in trust for employees of the State, while the remaining \$20,590,561 represents the assets held in trust for employees of other jurisdictions. In order to avoid duplication in reporting, the SDRS total of \$22,563 is included in the State total and the State's comprehensive annual financial report for the year ended June 30, 2016.

In March 2014, development began on the South Dakota Retirement System (RETAPP) system. Costs of the RETAPP system will begin to be capitalized and amortized once the application development phase is completed. The balance on contracts pertaining to the completion of the RETAPP project at June 30, 2016, was \$700,000.

11. Plan Termination

SDRS is administered in accordance with South Dakota statutes. The statutes provide for full vesting in accrued benefits upon termination of the plan (SDCL 3-12-72.2).

12. Commitments

At June 30, 2016, SDRS had uncalled capital commitments to private equity limited partnerships totaling approximately \$684,735,292 and to real estate limited partnerships totaling approximately \$1,095,521,684. The commitments may be called at the discretion of the general partner or may never be called.

13. Litigation

Deutsche Bank and Wilmington Trust Company have filed a number of actions around the country against selling shareholders, and those actions are all now consolidated in a Multi District Panel proceeding in the Southern District of New York (In re: Tribune Company Fraudulent Conveyance Litigation, Case No. 11-MD-2296). A separate adversary proceeding which was pending in Delaware has been consolidated into this action as well (The Official Committee of Unsecured Creditors of Tribune Company, on behalf of Tribune Company v. Dennis J. Fitzsimmons, et al., Case No. 1:12-cv-02652). SDRS is a defendant as a result of selling Tribune Stock in connection with a leveraged buyout of the Tribune Company in 2007. Through this lawsuit the creditors of Tribune Company are attempting to claw-back funds received in connection with the sale of the stock, which, in the case of SDRS, is approximately four million dollars. SDRS contends that it has persuasive arguments favoring dismissal and its counsel is vigorously working on this. The pending legal action does not represent an immediate negative contingency.

14. Assets Used in Plan Operations

These assets represent computer software development costs used by the System and are recorded at cost. Depreciation and amortization are calculated on the straight-line method over the estimated useful lives of the assets. The estimated useful life of computer software development costs is 10-15 years.

	<u>2016</u>
Computer software development in progress	\$1,779,220

REQUIRED SUPPLEMENTARY INFORMATION (CONTINUED)

Notes to Trend Data

Methods and assumptions used in calculations of actuarially determined contributions. The actuarially determined contribution rates in the schedule of System's contributions are calculated as of July 1, two years prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and assumptions were used to determine contribution rates reported in that schedule:

Valuation date	June 30, 2016
Actuarial cost method	Entry age normal
Amortization method	Level percentage of pay
Remaining amortization period	0 years
Asset valuation method	The prior year's Actuarial Value of Assets is credited each year with the assumed rate of investment return plus non-investment cash flow and SDRS liability gains or losses for the year, constrained to a range of 80% to 120% of the Fair Value of Assets
Actuarial assumptions:	
Investment rate of return	7.25% through FY 2017 and 7.50% thereafter
Projected salary increases	5.83% at entry to 3.75% after 30 years of service
Post-retirement mortality table:	
Active members	RP-2000 Employee Mortality Table projected generationally with Scale BB, with males adjusted by 85% and females by 48%.
Healthy inactive members, retired members and beneficiaries	RP-2000 Combined Healthy Mortality Table projected generationally with Scale BB, with males adjusted by 91% and females by 90%.
Disabled inactive and retired members	RP-2000 Disabled Retiree Mortality Table projected generationally with Scale BB.

CPAs & BUSINESS ADVISORS

Independent Auditor’s Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Board of Trustees
South Dakota Retirement System
Pierre, South Dakota

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the South Dakota Retirement System (SDRS), as of and for the year ended June 30, 2016, and the related notes to the financial statements, and have issued our report thereon dated October 19, 2016.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered SDRS’s internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of SDRS’s internal control. Accordingly, we do not express an opinion on the effectiveness of the SDRS’s internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. *A material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether SDRS’s financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

South Dakota Retirement System

October 12, 2016

Board of Trustees
South Dakota Retirement system
Post Office Box 1098
Pierre, SD 57501-1098

Dear Trustees:

I am pleased to submit the results of the annual Actuarial Valuation of the South Dakota Retirement System (SDRS), prepared as of June 30, 2016.

The purposes of this report are to provide a summary of the funded status of SDRS as of June 30, 2016, to compare the fixed, statutory member and employer contributions to the Actuarially Determined Contribution (ADC) under the SDRS Funding Policy and to provide accounting information under Governmental Accounting Standards Board Statements No. 67 and 68 (GASB 67 and 68). This Actuarial Valuation is based on financial and member data provided by SDRS and summarized in this report. I did not verify the data submitted, but did perform tests for consistency and reasonableness.

All members of participating employer units of SDRS and all benefits in effect on June 30, 2016 have been considered in this Actuarial Valuation. SDRS benefit provisions, Member data, and trust information are summarized in the sections that follow. No adjustments for events after the June 30, 2016 measurement date have been included.

The actuarial assumptions and methods used in this valuation for funding purposes meet the parameters set by the Actuarial Standards of Practice maintained by the Actuarial Standards Board. The assumptions and methods used to determine the ADC as outlined in this report and all supporting schedules meet the parameters and requirements for disclosure of GASB 67. All SDRS benefits are included in the determination of the ADC that is developed using the Frozen Entry Age actuarial cost method. The Actuarial Value of Assets is based on expected investment returns, limited to a 20% corridor around Fair Value of Assets and adjusted for liability gains or losses during the year. The undersigned believes the assumptions are, individually and in the aggregate, reasonably related to experience and to expectations of future experience.

SDRS's funding objectives under its Funding Policy include:

- Actuarial Value Funded Ratio of 100%
- Fair (Market) Value Funded Ratio of at least 100%

ACTUARY'S OPINION (CONTINUED)

- Fair (Market) Value of Assets that exceeds the Actuarial Value of Assets, resulting in a Cushion
- A fully funded System based on the Actuarial Value of Assets and the Entry Age Normal Cost method
- Fixed, statutory member and employer contribution rates sufficient to pay the Normal Cost and expenses and amortize the Unfunded Actuarial Accrued Liability over a period of 20 years or less when the System is not fully funded (ADC)

The results of this valuation indicate that as of June 30, 2016, SDRS continues to be a very well-funded system with a Fair Value Funded Ratio of 96.9%. The fixed, statutory member and employer contributions are sufficient to meet the ADC. However, SDRS is not currently meeting all of the funding objectives of the Board of Trustees' Funding Policy. Specifically, the Fair Value Funded Ratio is less than 100% and the Fair Value of Assets is less than the Actuarial Value of Assets, resulting in a Deficit, rather than a Cushion as of June 30, 2016.

The SDRS Board of Trustees' Funding Policy is attached in Section 6.

Future actuarial results may differ significantly from current measurements presented in this report due to such factors as plan experience differing from that anticipated by the economic and demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

Where presented, "Actuarial Value Funded Ratio" and "Frozen Unfunded Actuarial Accrued Liability" are measured on an Actuarial Value of Assets basis, while "Fair Value Funded Ratio" is measured on a Fair Value of Assets basis. Determining the unfunded liability using the Fair Value of Assets would lead to a different result. Moreover, the results herein are appropriate for evaluating the ability of accumulated assets and future contributions to fund SDRS benefits, but make no assessment regarding the funded status of the System if the System were to settle (i.e. purchase annuities for) a portion or all of its liabilities. In various place in this report, funded ratios and unfunded liabilities are shown based upon varying sets of assumptions as well as Fair Value of Assets as is required for certain disclosure information per accounting rules or statutes. Where this has been done it has been clearly indicated.

The undersigned is an Enrolled Actuary, an Associate of the Society of Actuaries, a Member of the American Academy and a Fellow of Actuaries of the Conference of Consulting Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. He is an employee of SDRS and is available to answer any questions on the material contained in the report or to provide explanations or further details as may be appropriate.

This report has been prepared in accordance with all applicable Actuarial Standards of Practice.

The undersigned actuary prepared the following schedules included in the Actuarial Section of the CAFR:

- Measures of Actuarial Soundness
- Actuarial Liability Gains and Losses
- Reserve for Funding of Long-term Benefit Goals
- Actuarial Assumption Tables
- Summary of Key Actuarial Measures
- SDRS 2016 Funding Requirements
- Development of SDRS Actuarial Value of Assets
- Summary of Funded Ratios and Funding Periods
- Summary of Actuarial Accrued Liability and Unfunded Actuarial Accrued Liability
- Solvency Test
- Schedule of Active Member Valuation Data
- Schedule of Retirees and Beneficiaries Added to and Removed from Benefit Payroll
- Comparison of Actuarial Valuation Results

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Douglas J. Fiddler".

Douglas J. Fiddler, ASA, EA, MAAA, FCA
Senior Actuary
South Dakota Retirement System

Note: Use of this report for any other purposes or by anyone other than the Board of Trustees and SDRS staff may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions or methods or the inapplicability of this report for other purposes. The attached pages should not be provided without a copy of this cover letter. Because of the risk of misinterpretation of actuarial results, you should ask the report's author to review any statement you wish to make on the results contained in this report.

ACTUARIAL OVERVIEW

An actuarial valuation of SDRS is performed as of June 30 each year. Prior to 1996, in odd-numbered years, an update was made which considered expected changes in the actuarial measures due to the assumed experience of the system as well as the effect of any changes in value of assets, actuarial valuation methods, or benefit provisions.

In the 2016 actuarial valuation, three important actuarial measures have been calculated in evaluating the actuarial soundness and funding progress of SDRS. They are:

- funded ratio
- funding period when an unfunded actuarial accrued liability (UAAL) exists
- risk management contribution amount when no UAAL exists

Actuarial Accrued Liability

The actuarial accrued liability (AAL) is the present value of all benefits currently being paid and expected to be paid in the future, to all members, less the present value of future normal cost contributions.

Funded Ratio

Two measurements of the funded ratio are calculated each year. The actuarial value funded ratio is equal to the actuarial value of assets divided by the AAL. The fair value funded ratio is equal to the fair value of assets divided by the AAL. A ratio in excess of 100 percent indicates that accrued benefits are fully funded. Prior reports identified fair value of assets and fair value funded ratio as market value of assets and market value funded ratio, respectively.

Funding Period

The funding period measures the length of time required to amortize unfunded actuarial accrued liabilities as well as pay the on-going normal costs, interest charges and expenses with the current contributions. The shorter the funding period, the more favorable the actuarial measure. In accordance with the Board of Trustees' funding policy objectives, the unfunded actuarial accrued liability has been \$0 since June 30, 2013, and no funding period is applicable.

Risk Management Contribution

The risk management contribution is equal to statutory contributions in excess of contributions required to fund normal costs, expenses and amortize any unfunded actuarial accrued liabilities. When the risk management contribution exists, it will increase the cushion and reserve for funding long-term benefit goals. During the year ending June 30, 2016, the cushion and reserve for funding long-term benefit goals were increased by a risk management contribution of \$31 million.

Measures of Actuarial Soundness

	2016 actuarial valuation	2015 actuarial valuation
Actuarial value funded ratio (actuarial value of assets/AAL)	100.0%	100.0%
Fair value funded ratio (fair value of assets/AAL)	96.9%	104.1%
Funding period	N/A	N/A
Risk management contribution	\$31M	\$29M

The time-weighted annualized investment performance based on the fair value of assets of the system for the most recent year was 0.30 percent after consideration of investment expenses. The money-weighted annualized investment performance based on the fair value of assets for the period was 0.21 percent after deducting investment expenses, less than the assumed rate of 7.25 percent for fiscal year 2016. This resulted in an actuarial investment loss of \$716 million. The actuarial value of assets was credited with the assumed rate of return of 7.25 percent for the one-year period ending June 30, 2016 and increased by the total liability loss of \$77 million. The reserve for funding of long-term benefits goals decreased from a balance of negative \$588 million as of June 30, 2015, to a balance of negative \$909 million as of June 30, 2016, as a result of recognition of investment returns below expectation for the current year, offset by investment returns above expectations for prior years. Net gains to be allocated to the reserve in the next four fiscal years total \$486 million as of June 30, 2016. The reserve for funding of long-term benefit goals is used exclusively for the determination of assets available to be considered for benefit improvements and a negative balance does not represent additional required funding.

Actuarial Investment Return Gains/Losses For the year ended June 30, 2016

	Amount of liability gain (loss)	Percentage of present value of all benefits
(Loss) due to compensation increases	\$(11M)	(0.09)%
(Loss) due to decrements	(11M)	(0.09)%
(Loss) due to rehired and new members	(7M)	(0.06)%
(Loss) due to July 1, 2015 retirements	(18M)	(0.14)%
(Loss) due to COLA for continuing inactives	(24M)	(0.19)%
Miscellaneous (Loss)	(6M)	(0.05)%
Total system (Loss)	\$(77M)	(0.62)%

Actuarial Liability Gains/Losses For the year ended June 30, 2016

Liabilities and contributions for funding purposes are computed using the frozen entry age actuarial cost method. Effective June 30, 2013, the frozen unfunded actuarial accrued liability was eliminated through an adjustment to the actuarial value of assets, cushion and reserve for funding of long-term benefit goals and will remain at \$0 unless and until it is increased to recognize a change in plan provisions or actuarial assumptions or to recognize a decrease in actuarial value of assets required to remain in the 20 percent corridor around fair value of assets. Under this method, experience gains or losses related to past service adjust the actuarial value of assets and gains and losses related to future service adjust the normal cost. This cost method was selected because it produces a consistent normal cost, as a percentage of payroll from year to year.

Actuarial Cost Method

When an unfunded actuarial accrued liability exists, the contribution requirement will include an amortization payment over a period not to exceed 20 years. No unfunded actuarial accrued liability currently exists.

The actuarial cost method used for financial reporting purposes is the entry age actuarial cost method. As of June 30, 2016, the liabilities are identical under the two methods. The normal cost in the financial reporting will reflect small differences based on the GASB 67 requirement to use the individual entry age cost method.

Actuarial Assumptions

Significant actuarial assumptions used include: a) a rate of return on the present and future assets of 7.25 percent a year for 5 years beginning July 1, 2012, increasing to 7.50 percent thereafter, compounded annually plus prefunding of improvement factor (COLA); b) projected Social Security cost-of-living increases of 3.25 percent and wage inflation of 3.75 percent per year compounded annually; c) pre-retirement and post-

ACTUARIAL OVERVIEW (CONTINUED)

retirement COLA increases of 2.7 percent per year compounded annually; d) active member salary increases that average 4.9 percent per year compounded annually; e) 80 percent of active members and 75 percent of retired and terminated members are assumed to be married; f) the male spouse is assumed to be three years older than the female spouse; g) mortality rates for active members are based upon the RP-2000 Employee Mortality Table, projected generationally with Scale BB with male rates multiplied by 85% and female rates multiplied by 48%; h) mortality rates for non-disabled pensioners are based upon the RP-2000 Combined Mortality Table, projected generationally with Scale BB with male rates multiplied by 91% and female rates multiplied by 90%; and i) at termination of employment, members will elect the more valuable of the accumulated contributions or the deferred vested benefit payable at retirement.

A detailed experience analysis was conducted in 2011 and 2012, and appropriate modifications in the demographic assumptions regarding assumed rates of member termination, retirement, and disability were made effective with the June 30, 2012 actuarial valuation. Also as a result of the experience analysis in 2012 and further study and debate of the SDRS Board of Trustees, changes were made to the economic actuarial assumptions effective for the June 30, 2012 actuarial valuation.

As a result of an extension of the experience analysis specific to mortality, changes were made to the mortality assumptions effective for the June 30, 2014 actuarial valuation.

The actuarial assumptions were recommended by the actuary and adopted by the SDRS Board of Trustees. Please see pages 52 and 53 for tables of actuarial assumption rates.

The actuarial assumptions for funding purposes are identical to the assumptions used for financial reporting purposes

The actuarial value of assets is credited each year with the assumed rate of investment return plus non-investment cash flow and reduced by liability gains and increased by liability losses for the year. It is restricted to a corridor of 80 percent to 120 percent of fair value of assets.

Summary of Actuarial Assumption and Method Changes

No changes were made to the actuarial assumptions or methods from those used for the June 30, 2015 actuarial valuation.

Cushion

The cushion is the excess of the fair value of assets over the actuarial value of assets. The cushion represents funds not currently required to maintain the actuarial soundness of SDRS and available to protect the system against future unfavorable experience.

The reserve for funding of long-term benefit goals was first implemented as of the year ended June 30, 1995, to fund benefit improvements and provide the system with protection against adverse experience. When implemented, actuarial investment gains (returns above the assumed investment return assumption) and actuarial investment losses (returns below the assumed investment return assumption) were recognized at the rate of 20 percent per year over a five-year period. Effective June 30, 1998, liability gains and losses were reflected in the same manner as investment gains and losses. The reserve was modified again as of June 30, 2001, to immediately recognize actuarial investment losses while still spreading the recognition of actuarial investment gains over five-year periods.

Reserve for Funding of Long-term Benefit Goals

The reserve for funding of long-term benefit goals (if positive), was included in the actuarial value of assets, the actuarial accrued liability and the present value of all benefits from June 30, 1995, through June 30, 2003. Effective June 30, 2004, the reserve was no longer added to the actuarial assets or liabilities. This change was made to more accurately reflect the funded status of the system.

SDRS gains and losses are allocated to the reserve for funding of long-term benefit goals. The amounts currently in the reserve and remaining to be allocated in the next four years are an important indicator of the system's recent cumulative experience. The reserve for funding of long-term benefit goals is also a source of funds to provide future benefit improvements or to protect the system against future unfavorable experience.

Balance as of June 30, 2015	\$(587,944,576)

ACTUARIAL VALUATION

Benefit Changes

No changes in benefit provisions were made from those recognized in the June 30, 2015 actuarial valuation. The June 30, 2016 actuarial valuation completely reflects all the provisions of the system in effect on June 30, 2016, as outlined in the plan summary section of the report.

Summary of Key Actuarial Measures

	2015 actuarial valuation results	System investment and liability experience for year ¹	Membership changes and maturity of system ²	Changes in benefit provisions, actuarial methods or actuarial assumptions effective July 1, 2015	2015 actuarial valuation results
Normal cost rate with expense provision	10.735%	—	(0.009)%	—	10.744%
Funding period	N/A	—	—	—	N/A
Frozen unfunded actuarial accrued liability	\$0	—	—	—	\$0
Actuarial value funded ratio	100.0%	—	—	—	100.0%
Fair value funded ratio	104.1%	(7.2)%	—	—	96.9%

¹ SDRS actuarial investment gains and liability gains and losses impact the cushion and the fair value funded ratio immediately and are smoothed and allocated to the reserve for funding of long-term benefit goals over five years. All SDRS actuarial investment losses are recognized immediately in the cushion, fair value funded ratio and reserve. The actuarial value of assets is increased by the SDRS liability loss or decreased by the SDRS liability gain each year.

² Changes to the membership from year to year will cause minor changes in the normal cost rate.

This section analyzes the ability of the statutorily required, fixed member and employer contributions to fund the obligations of the system. These obligations include both past and future liabilities.

Actuarial Soundness

An important measure of actuarial soundness is the adequacy of combined statutorily required member and employer contribution rates¹ to pay the normal cost of the system, system expenses, and amortize the unfunded actuarial accrued liability² (if one exists) over a limited time, including interest on the liability.

This measure of actuarial soundness is currently met. The funding requirements for SDRS for 2016, expressed as a percentage of payroll and total contributions, are based on the 2016 actuarial valuation and are summarized in the chart below.

SDRS 2016 Funding Requirements

	As a percentage of payroll	As a percentage of contributions
Total statutorily required employer and member contribution rate	12.489 ¹	100.0
Normal cost rate at mid-period	10.494	84.0
Expense allowance	0.250	2.0
Total funding requirement before amortization of frozen unfunded actuarial accrued liability	10.744	86.0
Contribution rate available to amortize frozen unfunded actuarial accrued liability (if one exists) (12.489%-10.744%)	1.745 ²	14.0

The 2016 actuarial valuation indicates that the frozen unfunded actuarial accrued liability remains at \$0 and the total statutorily required employer and member contribution rate of 12.489 percent is sufficient to pay the normal cost and expenses of the system and provides an additional amount that will contribute to the cushion and reserve in future years and be available to amortize the frozen unfunded actuarial accrued liability when one exists.

¹ Class A employers and members each statutorily contribute 6 percent of compensation. Class B employers and members each statutorily contribute 8 percent or 9 percent of compensation. Participating members also contribute for the optional spouse coverage and Class A employers contribute 6.2 percent of member's compensation in excess of the Social Security maximum taxable compensation. The total statutory contributions to SDRS as of July 1, 2016, are 12.489 percent of considered compensation.

² The frozen unfunded actuarial accrued liability is \$0 as of July 1, 2016.

ACTUARIAL VALUATION (CONTINUED)

The 2016 actuarial valuation confirms that:

- a. Funding of current benefit levels for active members and expenses requires 86 percent of the total contributions under the current actuarial assumptions and methods.
- b. No unfunded actuarial accrued liability exists and the portion of the statutorily fixed contributions available to amortize the unfunded actuarial accrued liability is available to increase the cushion and reserve for funding of long-term benefit goals.
- c. Excess investment income has been the most significant element of favorable experience in the past, even considering the actuarial investment losses in fiscal years 2001 through 2003 and 2008 through 2009.
- d. SDRS currently has a deficit (Fair Value of Assets less than Actuarial Value of Assets) of \$338 million.
- e. SDRS currently has a balance of negative \$909 million in the reserve for funding of long-term benefit goals and net gains of \$489 million to be allocated to the reserve in the next four years.

The actuarial valuation methodology results in the reduction of volatility in the actuarial measures because:

- a. The expected investment return of 7.25 percent of the actuarial value of assets and liability gains and losses are allocated to the actuarial value of assets.
- b. During periods when the frozen unfunded actuarial accrued liability is \$0, contributions over the normal cost and expenses of the system contribute to the cushion and reserve, providing additional resources to offset potential future unfavorable experience.

The 2016 actuarial valuation indicates that the statutorily required employer-member contribution rates are sufficient to pay the current costs of the system (normal cost plus expenses). As of June 30, 2016, the frozen unfunded actuarial accrued liability is \$0.

The most important indicators of the long-term actuarial soundness of the system are determined by the annual actuarial valuation of the system. The soundness is measured by the relationship of the normal cost to the total contributions available, the amount (if any) of the unfunded actuarial accrued liability, by the length of the funding period when an unfunded actuarial accrued liability exists, and by the amount of the cushion or deficit.

The current SDRS benefits combined with the present financing and the \$0 frozen unfunded actuarial accrued liability result in a well-funded system that is providing benefits essentially equal to the resources available.

SDRS is a consolidated, multiple-employer, cost-sharing retirement system that does not attempt to determine separate or unique funding requirements for entities or classes within SDRS. However, periodic studies are performed to analyze the balance of benefits and contributions provided to the two major member groups within SDRS with different funding and benefit provisions (Class A and Class B). Prior studies had found that the two classes were generally self-supporting. Further analysis during 2015 based on the current actuarial assumptions and current member demographics has suggested that the current provisions provide proportionately higher benefits to Class B members. While the dollar impact of the imbalance is not significant to SDRS overall, the SDRS Board of Trustees enacted design changes for Generational Members entering the System after June 30, 2017, to address this imbalance (as well as other subsidies) while also accomplishing other equitable design objectives.

Funding Policy

The SDRS Board of Trustees is responsible for maintaining the system’s funding policy. The current funding policy includes the funding objectives, the establishment of the cushion and reserve for funding long-term benefit goals, the policy regarding consideration of benefit improvements and the conditions requiring recommendation for corrective actions.

Benefit and Funding Objectives and Historical Summary

The benefit objectives of SDRS are to meet the needs of short- and long-term members by providing:

- Lifetime income replacement from SDRS resources of at least 55 percent of final average compensation for Class A members with 30 years of credited service
- Lifetime income replacement of at least 85 percent of final average compensation, including income from SDRS, Social Security, and personal retirement savings of at least one times annual compensation at retirement
- Provide limited inflation protection based on the SDRS funded status and annual cost-of-living adjustments
- Early retirement opportunities
- Vesting after three years of contributory service
- Disability and survivor income protection
- A portable retirement option that allows members to elect a refund of both member and employer contributions, plus interest
- Risk-free market interest rate credited on member and employer contributions

The funded ratio and funding period are the primary measures of SDRS’ soundness. However, when no frozen unfunded actuarial accrued liability exists, as is the case at June 30, 2016, the funding period is not applicable.

The SDRS funding objectives are to maintain:

- An actuarial value funded ratio of 100 percent
- A fair value funded ratio of at least 100 percent
- A ratio of fair value of assets to actuarial value of assets that exceeds 100 percent, resulting in a cushion
- A fully funded system, with no unfunded liabilities under the entry age normal cost method
- A funding period not to exceed 20 years when unfunded liabilities exist
- Statutory fixed contributions that meet or exceed the actuarially required contribution each year.

The schedule below presents the actuarial accrued liability funded ratio, the fair value funded ratio, and the funding period, where applicable, as of each actuarial valuation since 1988.

Valuation date	Actuarial accrued liability	Actuarial value of assets	Fair value of assets	Actuarial value funded ratio	Fair value funded ratio	Funding period
1988	\$1,078,235,569	\$1,050,836,113	\$1,192,526,624	97.5%	110.6%	6 years

¹Member and employer contributions were not sufficient to amortize the frozen unfunded actuarial accrued liability.

²Frozen unfunded actuarial accrued liability is \$0 as of June 30, 2013, June 30, 2014, June 30, 2015, and June 30, 2016.

ACTUARIAL VALUATION (CONTINUED)

Summary of Actuarial Accrued Liability and Unfunded Actuarial Accrued Liability

The schedule below compares total actuarial accrued liabilities to smoothed assets at actuarial value and unfunded actuarial accrued liabilities to payroll over time.

The smoothed assets to total liabilities ratios show the growth of assets compared to the growth of liabilities. The unfunded liabilities to covered payroll ratios are a measure of the ability of SDRS to meet its long-term obligations.

Level or increasing values for the first ratio and level or declining values for the second ratio are an indication of stable or improving funding.

Fiscal year	Actuarial accrued liability	Actuarial value of assets	Actuarial as a % of accrued actuarial liability	Unfunded actuarial accrued liability	Total covered payroll (000,000)	Unfunded liability as a % of payroll
1987-88	\$1,078,235,569	\$1,050,836,113	97.5	\$27,399,456	\$530.0	5.2
1989-90	1,404,616,511	1,275,091,534	90.8	129,524,977	582.7	22.2

The solvency test is a comparison of the adequacy of SDRS smoothed assets to the AAL for: 1) active member contributions; 2) benefits for present benefit recipients; and 3) employer-financed active member benefits.

Solvency Test

Fiscal year	Actuarial accrued liability for				Portion of actuarial accrued liability covered by actuarial value of assets for

¹ Excludes active, former Cement Plant Retirement Plan members for whom no compensation is reported. 2015 average revised for exclusion.

² Suspended members and beneficiaries were excluded from the reported 2014 totals, but footnoted. Total system members reported here for 2014 and 2015 include suspended members and beneficiaries.

South Dakota Retirement System (SDRS)

SDRS was established effective July 1, 1974. The Supreme and Circuit Court Judicial Retirement System, District County Court and Municipal Court Judges' Retirement Program, South Dakota Teachers' Retirement System, South Dakota Municipal Retirement System, South Dakota Law Enforcement Retirement System, South Dakota Public Employees' Retirement System and South Dakota Board of Regents Retirement System (effective July 1, 1975) were consolidated into SDRS. Effective April 1, 2014, the South Dakota Cement Plant Retirement Plan was merged into SDRS.

SDRS is a governmental retirement system created by Act of the State of South Dakota.

The Retirement System is administered by the Board of Trustees consisting of two state government members; two teacher members; a participating municipality member; a participating county member; a currently contributing Class B member other than a justice, judge or magistrate judge; a justice, judge, or magistrate judge; a participating classified employee member; one head of a principal department or one head of a bureau under the office of executive management; an individual appointed by the governor; a county commissioner of a participating county; a school district board member; an elected municipal official of a participating municipality; a faculty or administrative member employed by the Board of Regents; a retiree; and an investment council representative, ex-officio non-voting.

The board of trustees appoints an administrator as the system's executive director and chief executive officer.

Employers include the State of South Dakota and its departments, bureaus, boards, or commissions, and any of its governmental or political subdivisions or any public corporation of the State of South Dakota that elects to become a participating unit.

All of the following permanent full-time employees are included as Members in the System:

- All state employees;
- All teachers;
- All justices, judges, and magistrate judges;
- All law enforcement employees of counties and municipalities that are participating with their Class B employees;
- All general employees of counties and municipalities that are participating with their Class A employees;
- All classified employees of school districts that are participating with their classified employees;
- All employees of the Board of Regents;
- All state law enforcement officers.

Employees of the Department of Labor hired before July 1, 1980, who elected to remain covered under a former retirement plan, and members of the governing body of any participating county, municipality, or other public subdivision are excluded from SDRS membership.

Members

PLAN SUMMARY (CONTINUED)

Membership is immediate upon hire and is subdivided into three classes as follow:

- Class A members: all members other than Class B members.
- Class B members: members who are justices, judges and magistrate judges (*Class B Judicial Members*) and state law enforcement officers, municipal police, municipal firefighters, penitentiary correctional staff, county sheriffs, deputy county sheriffs, conservation officers, parole agents, air rescue firefighters, campus security officers, court services officers, certain park rangers and certain jailers (*Class B Public Safety Members*).
- Class C members: former members of the Cement Plant Retirement Plan which was merged into SDRS effective April 1, 2014.

Class A members constitute 93 percent of SDRS membership.

During the 2016 South Dakota Legislative Session, a new benefit structure was enacted for members joining SDRS after June 30, 2017. Members joining after that date will be called generational members and will have a different benefit structure than foundation members—members who joined on or before June 30, 2017. Details of the generational benefit structure are omitted from this report because no current members will receive benefits under the new structure.

Credited Service

Credited Service is the period of employment for an SDRS member which is considered in determining the amount of benefits. It includes the following:

- Years and fractional years for which member contributions were made (contributory service).
- The period of non-contributory service credited prior to July 1, 1974, under the prior retirement systems consolidated under this system.
- For employees of the Board of Regents, the period of service between April 1, 1964, and June 30, 1975, for which purchase was made to Bankers Life and the period of service prior to April 1, 1964, up to a maximum of 20 years, for which purchase was made.
- Periods of non-contributory service credited due to specific legislation since 1974.

Credited service may be purchased for public employment for which members are not entitled to retirement benefits, at an actuarial cost based on age and subject to a minimum of 100 percent of combined member and employer contributions. Credited service purchased after July 1, 2004, shall not be considered contributory service for eligibility purposes. Credited service is purchased with an after-tax payment unless the member's employer elects to permit purchase on a pre-tax basis under Section 414(h) of the Internal Revenue Code.

Compensation

Compensation is W-2 wages, plus any amount used to purchase a member's individual retirement plan, plus a member's contribution to SDRS made on a before-tax basis, plus any amount contributed to a Section 125 cafeteria plan, paid during the period of credited service. Compensation does not include lump sum termination pay. Compensation for members hired after June 30, 1996, is limited as prescribed in Section 401(a)(17) of the Internal Revenue Code.

Final average compensation is the highest average annual compensation earned by a member during 12 consecutive calendar quarters of the last 40 such quarters during periods of credited service. The final average compensation is limited by statutory provisions that prevent extraordinary increases in compensation immediately before retirement.

Final Average Compensation

Employer contributions equal those amounts contributed by members except for the additional contributions noted below.

Employer Contributions

Class A members: 6 percent of compensation
Class B Public Safety members: 8 percent of compensation
Class B Judicial members: 9 percent of compensation

Member Contributions

Member contributions are made on a pre-tax basis as permitted under Section 414(h) of the Internal Revenue Code.

Accumulated contributions are equal to member contributions and 85 percent of employer contributions (or 50 percent of employer contributions for members with less than three years of contributory service) credited with interest on an annual basis at a rate annually established by the Board of Trustees, that is no greater than 90 percent of the average 91-day I.S. Treasury Bill rate for the immediately preceding calendar year. Such rate shall have no minimum limitation and shall not be greater than the assumed rate of investment return, which is currently 7.25 percent.

Accumulated Contributions

For members who terminated prior to July 1, 2010, the percentage of employer contributions is 100 percent with three or more years of contributory service or 75 percent with less than three years of contributory service.

Effective July 1, 2002, employers contribute 6.2 percent of Class A member’s calendar year compensation in excess of the maximum taxable amount for Social Security for the calendar year. These additional contributions are not included in accumulated contributions.

Additional Contributions

Eighty percent of the benefits provided as “primary insurance amount or primary Social Security” under the Federal Social Security Act.

Other Public Benefits

The annual increase in the amount of the SDRS benefits payable on each July 1st is indexed to CPI and based on the SDRS fair value funded ratio as of the prior July 1. The amount of the increase is:

Cost-of-Living Adjustment (COLA)

- If the SDRS fair value funded ratio is 100 percent or more—3.1 percent COLA
- If the SDRS fair value funded ratio is at least 90 percent, but less than 100 percent, CPI with a 2.1 percent minimum and a 2.8 percent maximum
- If the SDRS fair value funded ratio is at least 80 percent, but less than 90 percent, CPI with a 2.1 percent minimum and a 2.4 percent maximum
- If the SDRS fair value funded ratio is less than 80 percent—2.1 percent COLA

All benefits except those depending on the member’s accumulated contributions are annually increased by the cost-of-living adjustment.

PLAN SUMMARY (CONTINUED)

Normal Retirement Age

The normal retirement age is age 65 with three years of contributory service for Class A and Class B Judicial members of the system. Normal retirement age is age 55 with three years of contributory service for Class B Public Safety members.

Normal Retirement Benefit

Members are entitled to retire with a benefit commencing the first of the month in which they reach normal retirement age and are payable for life, with an automatic 60 percent surviving spouse's benefit paid for the spouse's lifetime.

Class A Benefit

The Class A benefit is the larger of that provided by the following standard formula or alternate formula:

Standard Formula

Enhanced Benefit

1.7 percent times final average compensation times Class A credited service prior to July 1, 2008, plus

Base Benefit

1.55 percent times final average compensation times Class A credited service after July 1, 2008.

OR

Alternate Formula

Enhanced Benefit

2.4 percent times final average compensation times Class A credited service prior to July 1, 2008, plus

Base Benefit

2.25 percent times final average compensation times Class A credited service after July 1, 2008, less

80 percent of primary Social Security benefit.

Class B Public Safety Benefit

The Class B Public Safety benefit is:

Enhanced Benefit

2.4 percent times final average compensation times Class B Public Safety credited service prior to July 1, 2008, plus

Base Benefit

2.0 percent times final average compensation times Class B Public Safety credited service after July 1, 2008.

Class B Judicial Benefit

The Class B Judicial benefit is the sum of the following:

First 15 Years of Credited Service

Enhanced Benefit

3.733 percent times final average compensation times Class B Judicial service credited prior to July 1, 2008, with a maximum of 15 years, plus

Base Benefit

3.333 percent times final average compensation times Class B Judicial credited service after July 1, 2008, with a maximum of 15 years less Class B Judicial credited service prior to July 1, 2008

PLUS

Years of Credited Service in Excess of 15 Years

Enhanced Benefit

2.4 percent times final average compensation times Class B Judicial credited service in excess of 15 years and prior to July 1, 2008, plus

Base Benefit

2.0 percent times final average compensation times Class B Judicial credited service in excess of 15 years and after July 1, 2008.

All of the above benefits are paid monthly and limited to the maximum benefit under Section 415 of the Internal Revenue Code.

The monthly benefit payable upon retirement after normal retirement date is based on credited service and final average compensation to the member's actual retirement date.

Members are entitled to retire at the member's special early retirement date with a benefit equal to the normal retirement benefit based on credited service and final average compensation to date of retirement, with no reduction for early payment.

The special early retirement date is the date at which age plus credited service equal:

- 85 for Class A members, but not prior to age 55
- 80 for Class B Judicial members, but not prior to age 55
- 75 for Class B Public Safety members, but not prior to age 45

Delayed Retirement Benefit

Special Early Retirement Date (Rule of 85, Rule of 80, and Rule of 75)

PLAN SUMMARY (CONTINUED)

Early Retirement Benefit

Any member with at least three years of contributory service can retire in the ten years preceding their normal retirement age. The member will be entitled to receive the normal retirement benefit based on credited service and final average compensation to date of retirement, reduced by 1/4 of 1 percent for each full month by which commencement of payments precedes the earlier of the normal retirement date or the special early retirement date. Benefits commence on the first of the month following retirement (or the date chosen for payment to commence) and 30 days after the application for retirement benefits has been received by SDRS.

Vested Benefit and Portable Retirement Option

A terminated member with at least three years of contributory service will be entitled to receive the normal or early retirement based on the member's credited service at the time of termination of employment and increased by the cost-of-living adjustment from the date of termination to the date benefits commence.

In lieu of any monthly lifetime retirement benefits under the system, a terminating member may receive a lump-sum of his accumulated contributions under the portable retirement option. Members who are rehired may redeposit their accumulated contributions plus interest within two years of rehire to reinstate their credited service.

Disability Benefit

A contributing member, who becomes disabled with at least three years of contributory service, or was disabled by accidental means while performing the usual duties of his job, is entitled to an immediate monthly disability benefit.

For disability applications received on or before June 30, 2015, the disability benefit is equal to:

- For the first 36 months, 50 percent of the member's final average compensation, increased 10 percent for each eligible child to a maximum of four children.
- Starting with the 37th month,
 - if the member is receiving disability benefits from Social Security, the greater of:
 - 50 percent of final average compensation plus 10 percent for each eligible child to a maximum of 90 percent less the amount of primary Social Security.
 - 20 percent of final average compensation increased by the COLA
 - the unreduced accrued retirement benefit at date of disability
 - if the member is not receiving disability benefits from Social Security, the greater of:
 - 20 percent of final average compensation increased by the COLA
 - the unreduced accrued retirement benefit at date of disability

The maximum benefit is 100 percent of final average compensation (increased by the COLA) reduced by earned income and primary Social Security.

The above benefits are payable monthly.

At age 65 (or when there are no eligible children, if later), but not before five years of disability, the benefit payable is converted to the normal retirement benefits based on compensation increased by the COLA for the period between the date of disability and normal retirement age (projected compensation), and credited service as if employment had continued uninterrupted to normal retirement age (projected credited service).

.....

For disability applications received after June 30, 2015, the disability benefit is equal to the greater of:

- 25 percent of the member's final average compensation at the date of disability
- the unreduced accrued retirement benefit at the date of disability

The above benefits are payable monthly.

A surviving spouse of a disabled member who dies while receiving a retirement benefit after age 65 will receive 60 percent of the member's benefit for the spouse's lifetime.

Pre-Normal Retirement Age and Post-Disability Deaths

For deaths on or before June 30, 2015:

If an active member with at least one year of contributory service, or a member receiving a disability benefit commencing after July 1, 1974, dies, the surviving spouse having the care of eligible dependent children will receive an immediate benefit equal to 40 percent of the member's final average compensation, increased 10 percent for each child to a maximum of six children. If the surviving eligible dependent children are under the care of a guardian, the benefit payable will be 20 percent of the member's final average compensation for each child (to a maximum of five children).

The above survivor benefits are all payable monthly without improvements and reduced by 75 percent of primary Social Security benefit.

If no benefit is payable as defined above or payment has ceased, and the member's accumulated contributions have not been withdrawn, the spouse is entitled to receive at the spouse's age 65 a benefit equal to 60 percent of the normal retirement benefit that would have been payable to the deceased member at normal retirement age based on projected credited service and projected compensation, and further increased by the COLA for any time between normal retirement date and payment commencement date.

The benefit is payable to the spouse when the spouse reaches age 65. Effective July 1, 2015, a member's spouse may elect to commence survivor benefits as early as age 55 and the spouse's benefit is reduced by five percent for each year commencement precedes the spouse's age 65.

For deaths after June 30, 2015:

If an active member with at least three years of contributory service, or a member receiving a disability benefit approved after June 30, 2015, dies, the eligible dependent children will receive an immediate benefit equal to the greater of:

- 25 percent of the member's final average compensation at the date of disability
- the unreduced accrued retirement benefit at the date of disability

The benefit will be split equally among any eligible children of the member. The benefit ceases if there are no eligible children. If no benefit is payable as defined above, the spouse is entitled to receive at the spouse's age 65 a benefit equal to 60 percent of the benefit payable above increased by the COLA for any time between the date of the member's death and payment commencement date. If the benefit ceases due to no eligible children, the benefit is increased by the COLA for any time between the date benefit ceased and payment commencement date.

The spouse may elect to commence survivor benefits as early as age 55 and the spouse's benefit is reduced by five percent for each year commencement precedes the spouse's age 65.

Survivor Benefits

Post-Normal Retirement Age and Post-Retirement Deaths

Upon the death of a retiree or any member at or beyond normal retirement age, the surviving spouse is entitled to receive 60 percent of the monthly retirement benefit the member was receiving or was eligible to receive.

Terminated Member

If a member dies prior to benefit commencement, the accumulated contributions are refunded to the designated beneficiary, children, or estate in a lump sum.

Optional Spouse Coverage

Prior to June 30, 2010, a member could have elected to provide an additional benefit payable to the surviving spouse within 365 days after becoming a member, within 90 days following attainment of age 35, or within 90 days after the first anniversary of marriage. This optional coverage may continue until the member's spouse attains age 65, the death or disability of the member, the death of the member's spouse, termination of the member's marriage to his spouse, or the member's termination of employment.

The elected additional monthly benefit is equal to 40 percent of the member's final average compensation multiplied by the COLA for each full year between the date of death or disability of the member to payment commencement. Such benefit is paid upon the member's death from the time there are no eligible children until the spouse dies or attains age 65.

The cost of this protection is paid by the member through an additional contribution of 1.5 percent of compensation, which will not be matched by the employer and is not refundable.

Accumulated Contributions as Minimum Benefits

If the aggregate benefit payments received by a member and the member's beneficiary (excluding benefits received under the optional spouse coverage benefit provisions) do not equal the sum of the accumulated contributions, then the difference will be paid to the member's designated beneficiary, children, or estate in a lump sum.

Optional Forms of Retirement Payments

The monthly retirement benefits may be modified to an optional form of payment which is the actuarial equivalent of the benefit due under the system. A Social Security level income payment option is available for members who retire before age 62.

Administrative Expenses

Administrative expenses are paid from the system's assets in an amount not to exceed 3 percent of the annual member and employer contributions received by the system.

Retired Members

Retired members' and terminated vested members' benefits have been increased to reflect the benefit formula currently in effect for active members.

STATE INVESTMENT OFFICER'S LETTER

TO THE SOUTH DAKOTA RETIREMENT SYSTEM BOARD OF TRUSTEES:

This letter summarizes fiscal year 2016 investment performance for South Dakota Retirement System (SDRS) assets and discusses investment objectives, investing for the long term, and future return expectations. Additional information about the investments may be found in the South Dakota Investment Council annual report available at www.sdic.sd.gov.

FISCAL YEAR 2016 PERFORMANCE

The fiscal year 2016 investment return was 0.3% net of investment management cost. This was less than the Investment Council's market index-based benchmark return of 2.9% and the median state fund net return of 1.0%. The real estate category contributed most significantly to the underperformance.

INVESTMENT OBJECTIVES

The Council's overall objective is to prudently manage SDRS assets to achieve and exceed the returns available over the long term from the investment markets. The Council has two specific objectives. The first is to achieve and exceed the actuarial estimated return over the long term to help assure the financial health of SDRS. The other is to add value over the long term versus the Council's market index-based benchmark.

INVESTING FOR THE LONG TERM

The Council has managed SDRS assets since consolidation in 1974. Since inception, investment returns have meaningfully exceeded the Council's market index-based benchmark and other state retirement systems' returns across the nation.

The Council invests in assets believed to be undervalued from a long-term perspective. The investment valuation process is based on the view that the worth of an asset is the present value of its future cash flows. Internal research efforts focus on estimating future cash flows and assessing risk which impacts the rate used to discount cash flows to present value.

Results can vary significantly from year to year with many interim periods of underperformance in the Council's history. Whether an individual year is good, bad, or average, it is important to be mindful that the Council invests for the long term. Actions taken in one year may impact performance several years down the road. The long-term success has resulted primarily from adhering to the long-term strategies during underperforming periods.

RETURN EXPECTATIONS

The Council believes market return expectations should be based on forward-looking long-term cash flows rather than extrapolation of past returns which tend to relate inversely to future results.

As of June 30, 2016, long-term expected returns were 3.7% for bonds and 7.1% for stocks. Low interest rates foreshadow low future bond returns. The expected return for stocks is also lower than earned on average historically. The expected long-term return for the overall SDRS portfolio, which is diversified across a number of asset categories, is 6.1%. This excludes any impact of withdrawals from the fund and any value added or detracted relative to index returns. The expected return is the mid-point of a range of possible outcomes. The one standard deviation range, which statistically encompasses the central two-thirds of potential outcomes, is 1.2% to 11.0% per annum for a ten-year horizon and 2.7% to 9.5% for a 20-year horizon.

History has shown that following large out-performances, like experienced in recent years, opportunities may be sparse for a time. Chasing lesser opportunities has tended to backfire when those assets became much cheaper later. The lesson learned is to wait for worthwhile opportunities, and when absent, to be satisfied with modest results until better opportunities come along.

The Council values the excellent cooperative relationship with the SDRS Board of Trustees and staff. The Council believes this teamwork and a disciplined focus on long-term investment value will serve us well in the decades to come.

Submitted by:

Matthew L. Clark, CFA
State Investment Officer

The SDRS trust fund is invested under the direction of the South Dakota Investment Council. The Council is composed of five members at large with financial backgrounds and three ex-officio members, the State Treasurer, the Commissioner of School and Public Lands, and the SDRS Executive Director. The Council is a policy-making board and attends to matters such as asset allocation, portfolio strategy, and the selection or dismissal of outside investment managers.

The Investment Council

The data in the investment section of this report was prepared by the South Dakota Investment Council. The South Dakota Retirement System in conjunction with the South Dakota Investment Council and external auditors, Eide Bailly, prepared the investment section of this report.

The South Dakota Investment Council's overall objective is to prudently manage SDRS assets to achieve and exceed the returns available over the long term from the broad capital markets (stocks, bonds, real estate, etc.). The Council has three specific objectives. The first relates to achieving and exceeding the actuarial estimated rate of return over the long term to assure the financial health of SDRS. The other two objectives relate to adding value over the long term versus the index returns of the Council's capital markets benchmark and versus peer funds.

Investment Objectives and Policy

- Achieve and exceed the actuarial rate of return over the long term

The actuarial rate of return is an estimate of the investment return achievable over the long term through investing in the capital markets. The return estimate, along with other actuarial estimates such as member longevity, salary changes, and turnover, are used by the actuary to assess the funding status and overall health of a retirement system. Achievement of the actuarial return estimate is important to continued financial strength of SDRS. Any additional return can strengthen the financial condition and/or provide resources to address SDRS benefit goals.

If investment markets do not allow the Council or the Council simply fails to achieve the estimated return over the long term, South Dakota law may require benefit reductions. It is important that the actuarial estimated return be a reasonable expectation of what the capital markets can deliver or it may not be realistic to expect to achieve this objective.

- Achieve favorable total fund performance over the long term relative to a capital markets benchmark reflective of the Council's normal asset allocation policy

This is the most important specific investment objective in judging the Council's delivery of a competitive rate of return. The objective is to achieve and exceed the indexed returns that would be earned if SDRS was invested in the Council's selected capital markets benchmark. The key investment policy decision made by the Council relates to asset allocation.

This is difficult to accomplish as most investment managers do not outperform the capital markets over time. The zero sum nature of markets, with each investment transaction having a winner and a loser, means investors collectively merely match the overall market return before expenses. After taking into account investment manager fees and transactions costs, most managers underperform.

- Achieve favorable total fund performance over the long term relative to peer pension funds

INVESTMENT ANALYSIS (CONTINUED)

Prudent Man Standard

South Dakota Codified Law 4-5-27 requires that the South Dakota Retirement System trust fund be invested according to the Prudent Man Standard. South Dakota Codified Law defines the Prudent Man Standard as follows:

Any investment under the provisions of SD Codified Law Sections 4-5-12 to 4-5-39, inclusive, shall be made with the exercise of the degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion, and intelligence exercised in the management of their own affairs, not for speculation but for investment, considering the probable safety of their capital as well as the probable income to be derived.

Though monthly benefit payments exceed monthly contributions, the South Dakota Retirement System is not subject to sudden, substantial, and unexpected withdrawals. As a result, it is not necessary to have a high percentage of assets in short-term investments unless this is deemed to be the best investment strategy. This allows the trust fund to be as fully invested in stocks, bonds, and other alternatives as investment strategy dictates.

Asset Allocation

The decision most impactful to investment outcomes is the allocation of assets to categories such as stocks, bonds, real estate, and others. The Council establishes a benchmark asset allocation which considers expected long-term returns and risk to achieve SDRS investment objectives over the long term. This capital markets benchmark includes categories that are significant in size and can be passively implemented. The benchmark is intended to represent what is achievable through index funds without requiring exceptional skill. The benchmark is used to compare against actual results to assess whether value has been added. The benchmark itself is viewed as a challenging hurdle as most investors fail to keep up with index returns. The Council also establishes a minimum and maximum for each category. Niche or skill-based categories do not have weight in the benchmark but can have a permitted range for when the category valuation is depressed or superior managers are believed to have been identified.

It can be difficult to understand overall fund risk given multiple asset categories that can each behave uniquely. When the Council first began managing assets, most institutional portfolios consisted solely of stocks, investment grade bonds, and cash. Investors back then could quickly understand the level of risk by looking at the percentage of their fund invested in stocks. The Council's focus today is on measurement and management of equity-like and bond-like risk. Equity-like risk is the percentage invested in stocks plus any embedded equity exposure of other categories, particularly during times of market stress. Bond-like risk is the percentage invested in investment grade bonds plus any embedded bond exposure of other categories. The benchmark equity-like risk is 70% with a permitted range of 50% to 85%. The benchmark bond-like risk is 30%, including a small amount of cash exposure, with a permitted range of 15% to 50%.

Allocations to equity-like and bond-like risk, as well as individual asset categories, vary within permitted ranges. The valuation process which drives the allocations within the ranges is based on the present value of estimated future cash flows. Research efforts focus on estimating cash flows and risk based discount rates.

Conventional statistics measures of risk are also calculated. Standard deviation is a measure of volatility and correlation is a measure of the degree that categories provide diversification. Conventional measures are helpful for understanding risk in normal times but understate real-world frequency and magnitude of severe declines. The Council adjusts statistical measures to better reflect risk when it matters most, which is during severe declines. Liquidity is monitored to minimize risk of forced liquidations.

On June 30, 2016, the equity-like risk of the SDRS fund was 63.4% compared to the fiscal year 2016 capital markets benchmark level of 70.0%. This difference is due to a reduction in equity-like risk based on stock market valuations having become somewhat expensive.

The expected long-term return for the benchmark allocation as of June 30, 2016, was 6.1%. This excludes any potential value added or detracted relative to index returns resulting from managing the fund. The estimated rate of inflation embedded in the expected return was 2.3%. Standard deviation was estimated to be 15.4% after adjustments to capture real-world frequency of adverse events. These statistics indicate a 66% chance the return for any year would be between (9.3%) and 21.5% and a 95% chance the return would be between (24.7%) and 36.9%.

The greatest risk to markets may be unsustainable buildup of global debt. The consequence is likely muted growth and heightened risk of eventual inflation to inflate away the debt or deflationary debt liquidation. The Council is mindful of these risks as it continues to invest for the long term.

FY07-16	6.8%	5.9%

Time-Weighted Rate of Return is the rate of investment growth earned on a unit of assets held continuously for the entire period measured and is used to compare returns against other investment managers and indexes.

Money-Weighted Rate of Return considers the changing amounts actually invested during a period and weights the amount of pension plan investment by the proportion of time they are available to earn a return during that period. The rate of return is then calculated by solving, through an iterative process, for the rate that equates (1) the sum of the weighted external cash flows into and out of pension plan investments to (2) the ending fair value of the pension plan investment.

Capital Markets Benchmark is the asset allocation policy approved by the Investment Council applied to the appropriate index returns.

*IRRs linked for annualized periods

The Council has invested in real estate (RE) and private equity (PE) limited partnerships since the mid-1990's. Although these investments are illiquid and have higher fees, the Council believes that they offer diversification and the opportunity for added value net-of-fees over public market investments. The funding of these investments is made over several years as the partnerships call money from investors to buy assets and later return it when assets are sold. According to industry standards, the return analysis for these investments requires the use of a since inception internal rate of return (SI-IRR).

SI-IRR is the calculation that equate the present value of all cash flows (capital calls and distributions) with the period-end value. The public market equivalent (PME) is a method where a public market index is expressed in terms of a SI-IRR, using the same cash flows and timing as those of the partnership investment over the same time period. The partnership SI-IRR is calculated net-of-fees (management fees, performance based fees and general partner carried interest). Also, a composite SI-IRR that combines the partnerships in each category is calculated.

From November of 1995 through June of 2016, the net-of-fees SI-IRR for the composite PE limited partnership investments was 8.7%. This can be compared to the S&P 500 Index PME of 5.7% for the same period. RE limited partnerships net-of-fees SI-IRR composite from December of 1994 through June of 2016 was 21.0%. A PME using the MSCI US REIT Index could not be calculated using the same cash flows because the return of the RE limited partnerships was significantly higher than the index. The annualized time-weighted rate of return for the MSCI US REIT Index was 11.3% for the same period of time.

The composite return of the RE limited partnerships has significantly exceeded and the PE limited partnerships has slightly exceeded Council expectations. The SDIC will continue its ongoing evaluation of RE and PE limited partnerships.

See the South Dakota Investment Council Annual Report on the SDIC website, www.sdic.sd.gov, for more details on this topic.

MEMBERSHIP PROFILE

Public Entities Participating in SDRS

All teachers, higher education personnel, and legislative, executive, and judicial employees are required to participate in SDRS. Counties, municipalities, and other public entities, however, have the option of participating, and school districts may choose whether or not to include their classified employees.

The following schedules list SDRS participating entities by group, the number of active members in each group, and each group's percentage of the 39,940 total active members as of June 30, 2016.

School Districts Membership: 18,031
